Overview

This publication is the twelfth in a series of corporate tax statistical reports to be published by the Department of Taxation and Finance's Office of Tax Policy Analysis (OTPA). The reports are intended to provide a summary of corporate tax data to aid parties in their analysis of New York's corporate tax structure. The last report in this series was for the 2003 liability year.

The tables in this report present tax statistics for Article 9-A (the franchise tax on business corporations), Article 9 (the corporation and utilities tax), Article 32 (the franchise tax on banking corporations), and Article 33 (the franchise tax on insurance companies). The report focuses on the franchise taxes imposed under these articles. This enables data users to more easily understand the corporate franchise tax population and liability. By definition, it includes the excise taxes imposed under Article 9, Sections 186-a and 186-e.

Selected statistics presented in this publication may differ from data provided prior reports and other published statistical documents. This is due to improvements in data collection and enhancements in data verification procedures.

Terms and data used in tables and charts, as well as data sources used in this report, are explained in Appendix A: Description of Terms and Data and Data Sources; Appendix B lists tax rate changes in 2003 and 2004; Appendix C contains descriptive charts of the calculation of tax liability for Articles 9-A, 32 and 33; Appendix D contains the historical tables, starting with the 2000 tax year; and Appendix E lists sources of tax return data for 2004.

Data sources for Articles 9-A, 32, and 33 were revised starting with the 2002 report. A significant change was made to the definition of which taxpayers are included in the data files for the 2002 liability year. In addition, the manner in which data is presented by industry for Article 9-A taxpayers was revised based on changes to NAICS industry coding. For details, see Appendix A.

Recent tax law changes have had an impact on the business population and the data presented in these reports. Some examples include:

- Significant restructuring of the Franchise Tax on Insurance Corporations
- Significant reductions in tax rates for all corporate taxes
- Shifting of certain taxpayers out of the Corporation and Utilities Tax and into the Corporate Franchise Tax
- Restructuring of the Article 9-A fixed dollar minimum tax
- Creation of new tax credits for banks and insurance companies.

These law changes have changed the size of tax burdens, the distribution of the burden within industries and the share each article represents of total State tax revenues.

There have been a number of significant new tax laws. For highlights of tax actions, see OTPA's *Summary of Tax Provisions*, published each year. This report and others are available on the Department's Web site at: http://www.nystax.gov/statistics. The New York State Tax Sourcebook, also published by OTPA, contains both historical and current information on tax law changes.

Tax Articles: Data Summary

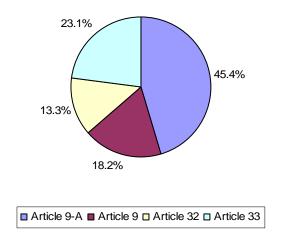

Table 1 provides a summary of the number of taxpayers and tax liability for the selected tax articles presented in this report. The data compares the 2003 and 2004 tax years. Consistent with previous years, Article 9-A represents the greatest number of taxpayers and the largest amount of tax liability. Article 32, the franchise tax on banking corporations, represents the smallest in both categories for 2004. Total corporate tax liability grew by \$416 million, or about 12 percent, from 2003 to 2004.

Table 1: Selected Tax Articles — Total Number of Taxpayers and Tax Liability 2003 and 2004

Tax Articles: 2004

Highlights

Article 9-A: Franchise Tax on Business Corporations

Highlights

- The number of Article 9-A taxpayers increased by 2 percent from 2003 to 2004, and total tax liability grew by 22 percent.
- The number of C corporation filers increased by less than 1 percent, but total liability for C corporations increased by 23 percent.
- The number of S corporation filers grew by 3 percent, and total liability for S corporations grew by 13 percent.
- S corporations represented 57 percent of all Article 9-A filers, but C corporations represented 97 percent of total liability.
- As in previous years, the entire net income (ENI) base continued to contribute the most to total C corporation tax liability. ENI base filers constituted 21 percent of total C corporation returns. However, this tax base contributed 86 percent of total C corporation tax liability.
- Total liability for the entire net income base grew by 24 percent from 2003 to 2004. Over this same period, liability for the fixed dollar minimum tax base grew by 106 percent. The new minimum tax amounts of \$5,000 and \$10,000 introduced in 2004 generated a significant amount of tax liability.
- Tax liability grew for most industries from 2003 to 2004, although the relative share represented by each sector remained fairly steady.

Article 9: Corporation and Utilities Tax

Highlights

- The number of taxpayers declined by 884 from 2003 to 2004, while total tax liability declined by approximately \$80 million over this period.
- The greatest number of taxpayers paid under Sections 183 and 184. Section 183 is the franchise tax on transportation and

transmission corporations and Section 184 is an additional tax on transportation and transmission corporations and associations.

- Section 186-e (excise tax on telecommunications services) taxpayers incurred the highest tax liability, while Section 186-a (gross receipts tax on the furnishing of utility services) taxpayers ranked as the second highest in 2004.
- In 2004, businesses subject to Sections 186-a and 186-e incurred more than 85 percent of all Article 9 tax liability.
- There was a large decline in the number of taxpayers and tax liability of Section 186-a.

Article 32: Franchise Tax on Banking Corporations

Highlights

- Total tax liability for Article 32 increased by \$110 million, from \$396.5 million in 2003 to \$506.8 million in 2004.
- The portion of bank tax liability represented by clearinghouse/commercial banks rose significantly from 2003 to 2004.
- The vast majority of bank tax liability continues to come from the income base. The income base accounted for 70 percent of bank tax liability in 2003 and 76 percent in 2004.
- The alternative bases (alternative ENI and assets) account for almost all of the remainder of bank tax liability. The alternative bases accounted for 30 percent of liability in 2003 and 24 percent in 2004. The minimum tax accounts for less than 1 percent of bank tax liability in both years.
- The amount of positive allocated entire net income reported for all banks increased from \$4.6 billion in 2003 to \$6.0 million in 2004. Negative allocated entire net income increased from \$4.3 billion to \$4.4 billion over this period.

Banks used \$56 million in tax credits in 2003 and \$49 million in 2004.

Article 33: Franchise Tax on Insurance Corporations

Highlights

- Total tax liability for Article 33 increased by \$70 million, from \$809 million in 2003 to \$879 million in 2004.
- Foreign insurers accounted for the majority of Article 33 taxpayers and total tax liability in both 2003 and 2004.
- Total tax liability for life insurers grew by \$43 million from 2003 to 2004, from \$166 million to \$208 million. Close to 85 percent of life insurers paid on the entire net income tax base in 2004.
- Total tax liability for non-life insurers rose from \$643 million in 2003 to \$671 million in 2004. Most non-life insurers paid on the premiums tax base, and accounted for nearly all the liability for non-life insurers.
- The total amount of premiums tax paid by Article 33 taxpayers grew by \$52 million, from \$803 million in 2003 to \$855 million in 2004.
- The floor limitation affected 58 life insurers in 2004, raising their tax by \$23 million. The limitation on tax affected 125 life insurers in 2004, lowering their tax by \$140 million.
- Total tax before credits for Article 33 taxpayers rose from \$926 million in 2003 to \$1,003 million in 2004. The total value of tax credits rose from \$117 million to \$124 million over this period.

Article 9-A: Franchise Tax on Business Corporations

Tax Structure: Tax Law as of 2004 Article 9-A imposes a tax on corporations for the privilege of exercising a corporate franchise in the State. All domestic corporations (organized in New York State), and all foreign corporations (organized in another state or country) doing business, or employing capital, or owning or leasing property in a corporate or organized capacity, or maintaining an office in the State, become subject to the corporate franchise tax. Article 9-A applies to any general business corporation except those specifically exempt or those subject to tax under other specified articles of the tax law.

C Corporations compute tax under four bases: entire net income (ENI); business and investment capital; alternative minimum taxable income (AMTI); and fixed dollar minimum amounts. The corporation pays the tax computed on the base that yields the highest liability. An additional tax applies, based on the value of the corporation's subsidiary capital allocated to the State, which is taxed at the rate of 0.09 percent.

- A rate of 7.5 percent applies to the ENI base. A tax rate of 6.85 percent applies to small business corporations with ENI of \$200,000 or less. Graduated rates apply to qualified small business corporations with ENI of more than \$200,000, but not more than \$290,000.
- A rate of 0.178 percent applies to the capital base. Allocated business and investment capital form the capital base. Total tax liability under the capital base is capped at \$350,000.
- A rate of 2.5 percent applies to the AMT base. The AMT base equals ENI adjusted to reflect certain federal tax preference items and adjustments and state specific net operating loss (NOL) modifications.
- Separate fixed dollar minimum amounts apply, based on a corporation's gross annual payroll, including general executive officers, during the applicable tax period. The amounts range from \$100 to \$10,000.

A fixed amount of \$800 applies to corporations whose gross property, receipts and payroll are each less than \$1,000.

Corporations allocate ENI, business capital and AMT income using a three factor-formula to proxy their economic presence in the State. Representative factors include owned and rented real and tangible personal property, business receipts and payroll (exclusive of general executive officers). Corporations allocate investment capital and income to New York based on the New York presence of the issuer of the investment instrument.

Corporations that elect S corporation status for federal and New York tax purposes compute an entity level tax imposed by Article 9-A. The tax for S corporations is solely the Article 9-A fixed dollar minimum tax, imposed at the same rates as on C corporations. Before 2003, S corporations were subject to a differential tax on entire net income based on the difference between the corporate and personal income tax rates.

Significant Tax Law Changes: 2003 and 2004

2003

- The S corporation differential tax on entire net income was eliminated for taxable years beginning on or after January 1, 2003.
- The tax rate on entire net income was reduced from 7.5 percent to 6.85 percent for small business taxpayers with ENI of \$200,000 or less. For small business taxpayers with entire net income of more than \$200,000 but not more than \$290,000, graduated rates were imposed on the amount of the ENI base between \$200,000 and \$290,000. These changes were effective for taxable years beginning on or after July 1, 2003.

2004

The structure of the fixed dollar minimum tax was expanded, creating two new top payroll brackets, and raising the top minimum tax amount from \$1,500 to \$10,000. Effective for taxable years beginning on or after January 1, 2004.

Statistical Summary: Comparison of 2003 Versus 2004

The corporate franchise tax represented approximately 45 percent of total New York State corporate tax liability in 2004. There were 601,850 corporate taxpayers (both C corporations and S corporations) that filed returns in this year. These taxpayers reported a total tax liability of about \$1.7 billion.

Table 4 summarizes and compares information from taxable returns filed by Article 9-A corporations in 2003 and 2004. In 2004, total tax liability grew by \$338 million from 2003, an increase of 24.4 percent.

Table 4: Profile of C and S Corporations, Number of Taxpayers and Tax Liability – 2003 and 2004

Tax Year	2003	2004
Numl	per of Taxpayers	
Number of C Corporations	256,926	257,538
Number of S Corporations	335,122	344,312
Total Number of Corporations	592,048	601,850
Mill	ions of Dollars	
Tax Liability C Corporations	\$1,336	\$1,667
Tax Liability S Corporations	51	58
Total Tax Liability	\$1,387	\$1,725

Distribution of Article 9-A Taxpayers and Tax Liability Table 5 shows both 2003 and 2004 C and S corporations by basis of tax for the number of taxpayers and tax liability. There was a large increase in liability for C corporations paying on the entire net income and fixed dollar minimum tax bases, which contributed to an overall increase in C corporation liability. The increase in liability under the fixed dollar minimum tax was due to the restructuring of this base in 2004. The distribution of the number of taxpayers by tax base remained virtually the same from year to year.

		Number of Taxpayers			Ta	Tax Liability*	
Type of Corpora	ation Base of Primary Tax	2003	2004	Percent Change	2003	2004	Percent Change
C Corporation	Entire Net Income	52,312	53,126	1.6	\$1,152,611,484	\$1,425,836,782	23.7
	Fixed Dollar Minimum Tax	161,544	161,371	-0.1	38,292,834	78,823,638	105.8
	Capital	35,930	35,729	-0.6	126,831,259	127,440,816	0.5
	Alternative Minimum Taxable Income	7,140	7,312	2.4	39,829,101	34,807,120	-12.6
C Corporation To	tal	256,926	257,538	0.2	\$1,357,564,678	\$1,666,908,356	22.8
S Corporation	Fixed Dollar Minimum Tax	335,122	344,312	2.7	51,367,644	57,791,620	12.5
Article 9-A Total		592,048	601,850	1.7	1,408,932,322	1,724,699,976	22.4

^{*}Tax liability includes the tax on subsidiary capital paid by 1,657 taxpayers valued at \$15.8 million in 2003, and 1,564 taxpayers valued at \$17.7 million in 2004. Tax liability excludes the MTA surcharge.

The data in Figure 2 illustrate that the greatest number of C corporations paid tax on the fixed dollar minimum tax base for both 2003 and 2004. This base represented 62.9 percent of taxpayers in 2003 and 62.7 percent in 2004. The entire net income base and the capital base were second and third respectively in both years.

Figure 2: Distribution of Number of C Corporations by Basis – 2003 and 2004

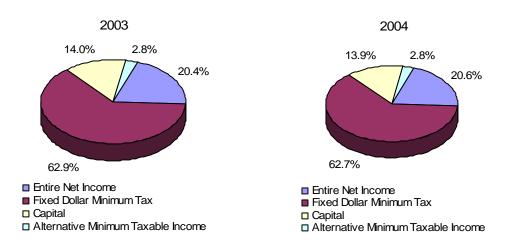

Figure 3: C Corporation Tax Liability by Basis - 2003 and 2004

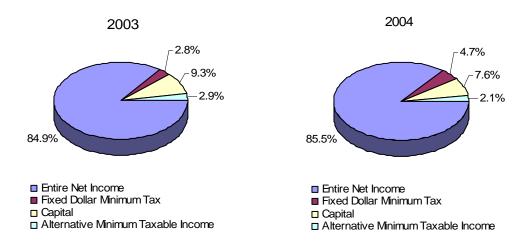

Figure 3 shows that the greatest share of tax paid was under the entire net income base for both 2003 and 2004. The fixed dollar minimum, alternative minimum taxable income, and the capital bases represented much smaller shares of tax liability in each year.

Tax liability for taxpayers subject to the fixed dollar minimum tax varies by size of gross payroll. The gross payroll thresholds for the tax were restructured in 2004, resulting in the elimination of the \$225 minimum tax amount, and the replacement of the \$1,500 amount with two new amounts of \$5,000 and \$10,000. However, as Figure 4 shows, the vast majority of fixed dollar minimum taxpayers still paid the \$100 amount in both 2003 and 2004.

Figure 4: Number of Fixed Dollar Minimum Taxpayers by Fixed Dollar Minimum Tax - 2003 and 2004

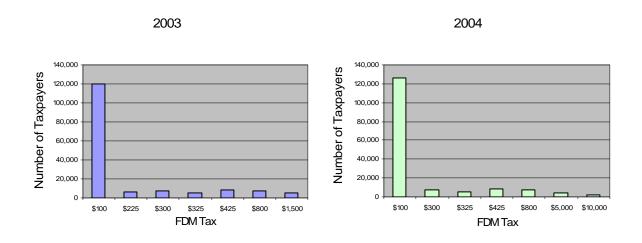

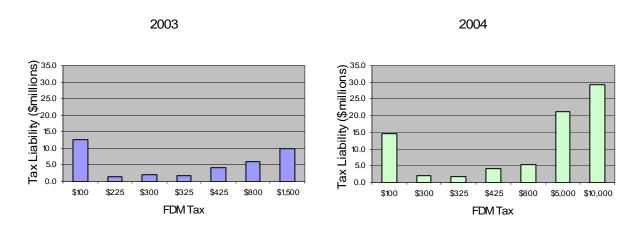

Figure 5 below shows the distribution of tax liability within the fixed dollar filing population. The creation of the \$5,000 and \$10,000 minimum tax amounts in 2004 shifted the distribution of liability within the tax. The \$100 minimum tax amount produced the greatest liability in 2003, followed by the \$1,500 amount, while the \$10,000 amount was highest in 2004, followed by the \$5,000 amount.

Figure 5: Liability of Fixed Dollar Minimum Taxpayers by Fixed Dollar Minimum Tax - 2003 and 2004

Industry Profiles: 2003 Versus 2004 Table 6 profiles the distribution of taxpayers and liability by major industries. The distribution of tax liability by industry was fairly similar in both years. The largest increase in the relative share for an industry was for finance and insurance, while the largest decline was for the information sector. These two sectors also experienced the largest actual increase and decline in tax liability, respectively.

Table 6: Percent Change in	Distribution of C Corpo	oration Taxpavers and Tax	x Liabilitv bv Indus	try - 2003 and 2004

C Corporations by Filing Period 2003 and 2004: Number of Taxpayers Table 7 shows that the greatest number of taxpayers filed as calendar year taxpayers with a tax year beginning January 1 for both 2003 and 2004. The next largest number filed for the fiscal year beginning July 1 in both years. The fewest number of taxpayers filed with a fiscal year beginning February 1 in 2003 and December 1 in 2004.

Table 7: Distribution of C Corporation Taxpayers by Fiscal Period – 2003 and 2004

	Number of Taxpayers	 S
Fiscal Year Beginning	2003	2004
January	134,041	136,113
February	7,887	8,233
March	9,337	9,165
April	14,982	14,757
May	9,889	9,803
June	10,114	9,968
July	17,585	17,173
August	8,998	9,017
September	9,786	9,487
October	16,193	15,882

C Corporations by Filing Period 2003 and 2004: Tax Liability As Table 8 shows, calendar year filers overwhelmingly reflected the greatest amount of tax liability for tax years beginning in both 2003 and 2004. In both years, February was the second highest month for tax liability, while May filers had the least liability.

Detailed Article 9-A Summary Tables

This section contains detailed Article 9-A summary tables for the 2004 tax year. Consistent with the data presented in the main text of this report, the data includes the tax on subsidiary capital. The total tax on subsidiary capital was \$17.7 million in 2004. In addition, liability includes the fixed dollar minimum tax on subsidiaries. Tax liability excludes the MTA surcharge.

The following tables present data on C corporations only. Tables 13 through 20 do not include data for certain fixed dollar minimum tax filers because most of the items presented in these tables are not verified for these filers. Therefore, the number of taxpayers and amount of tax liability presented in these tables will differ from that presented in the other tables included in this report. In certain tables, tax law provisions prohibit the disclosure of data. The data are included in the appropriate totals, and are designated by "d/".

^{1/} Tax liability excludes the MTA surcharge.

^{2/} Corporations computing their tax after credit on the net income base. Data represent total net income before allocation to New York State.

^{3/} Tax liability includes the tax on subsidiary capital.

^{4/} Data for selected three and four-digit NAICS subsectors may not necessarily add to the appropriate totals for the two-digit NAICS industry sectors.

This is due to the fact that data may not be presented for all subsectors in a given industry sector. However, data for all subsectors are included in the appropriate industry sector totals.

d/ Tax Law provisions prohibit disclosure of data. However, the data are included in the appropriate totals.

Article 9: Corporation and Utilities Tax

Tax Structure: Tax Law as of 2004

Article 9 contains several separate taxes that apply to various general and specialized businesses operating in New York State. These taxes appear in separate sections of Article 9 as follows:

- Section 180 organization tax on domestic (New York State) corporations;
- Section 181 license and maintenance fees on foreign (out-of-state) corporations;
- Section 183 franchise tax on transportation and transmission companies and associations;
- Section 184 additional franchise tax on transportation and transmission companies and associations;
- Section 185 franchise tax on cooperative agricultural corporations;
- Section 186 franchise tax on waterworks companies, gas companies, electric or steam heating, lighting and power companies;
- Section 186-a gross receipts tax on the furnishing of utility services;
- Section 186-e excise tax on telecommunications services; and
- Section 189 tax on businesses importing natural gas for their own consumption.

This report presents data for six sections of Article 9. Section 180, Section 181, and Section 189 are not included as these taxes are not reported on an annual basis and insufficient data is available for these taxpayers.

Significant Tax Law Changes: 2003 and 2004

2003

- The rate of tax under Section 186-a is reduced for tax years beginning on or after January 1, 2003 as follows:
 - Gross income-receipts from transportation and distribution: rate is reduced from 2.4 percent to 2.25 percent;
 - Gross income-receipts from commodities charges: rate is reduced from 1.9 percent to 0.85 percent; and
 - Gross operating income: rate is reduced from 1.9 percent to 0.85 percent.

2004

- The rate of tax under Section 186-a is reduced for tax years beginning on or after January 1, 2004 as follows:
 - Gross income-receipts from transportation and distribution: rate is reduced from 2.25 percent to 2.125 percent;
 - Gross income-receipts from commodities charges: rate is reduced from 0.85 percent to 0.4 percent; and
 - Gross operating income: rate is reduced from 0.85 percent to 0.4 percent.

Statistical Summary: Comparison of 2003 Versus 2004

The corporation and utilities tax still represents a significant share of total New York State corporate tax liability. The number of Article 9 taxpayers totaled 4,182 in 2004, representing a total tax liability of \$690.0 million.

Table 21 summarizes information from taxable returns filed by Article 9 corporations in 2003 and 2004. The number of taxpayers declined by 884 from 2003 to 2004, while total tax liability declined by approximately \$80 million over this period.

Table 21: Article 9 Number of Taxpayers and Tax Liability – 2003 and 2004

f	Tax Year	Tax Year
Article 9	2003	2004
Total Number of Taxpayers	5,066	4,182
Total Tax Liability	\$770,229,198	\$690,030,377

Distribution of Article 9 Taxpayers and Tax Liability Table 22 and Figure 6 compare the number and share of taxpayers for tax years 2003 and 2004. The number of taxpayers declined overall from year to year, with all sections except Section 185 experiencing a decrease. The largest decrease was for Section 184. The relative share of the total number of taxpayers for each section remained virtually the same over this period.

Figure 6: Share of Number of Article 9 Taxpayers by Section

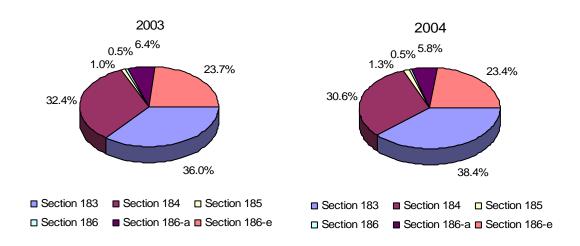

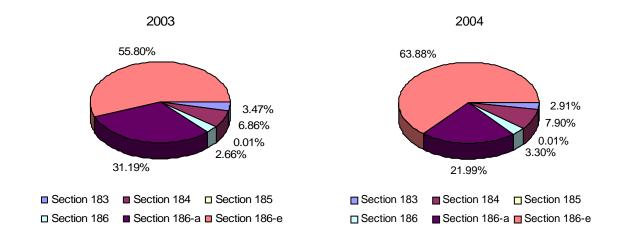

Table 23 and Figure 7 compare total tax liability and share of liability for 2003 and 2004. Tax liability grew for some sections, while it declined for others. The largest decline was for Section 186-a, due to the continued reduction in the tax rate for this section. The relative share of liability represented by Section 186-e grew from 2003 to 2004 due to the decline in liability under Section 186-a.

Figure 7: Share of Article 9 Tax Liability by Section

Article 32: Franchise Tax on Banking Corporations

Tax Structure: Tax Law as of 2004

Article 32 levies a franchise tax on banking corporations doing business in the State. The bank tax is computed on the highest of four alternative bases:

- 7.5 percent of allocated entire net income (ENI); or
- 3 percent of alternative income (ENI without regard to specified exclusions); or
- one-tenth, one twenty-fifth or one-fiftieth of a mill of taxable assets allocated to New York (depending on net-worth-to-asset ratio and percentage of assets secured by mortgages); or
- a minimum tax of \$250.

Calculation of the tax based on allocated ENI begins with federal taxable income, to which certain exclusions and deductions are applied. Taxpayers then make several other modifications, and allocate their income to arrive at New York taxable income. These modifications include, for example, a bad debt deduction for large commercial banks, a deduction for the eligible net income of international banking facilities (IBFs), deductions for a portion of interest income from government obligations, and interest and dividend income from subsidiary capital.¹

Banks conducting business both inside and outside New York allocate their income and assets by applying a three-factor allocation formula consisting of payroll, deposits, and receipts. The receipts and deposits factors are double-weighted and the payroll factor is single-weighted.

Alternative entire net income differs from ENI in that it does not include deductions for portions of subsidiary interest and interest on government obligations. In addition, the factors of the alternative income allocation formula are single weighted.

The tax on allocated taxable assets starts with the taxpayer's total assets. Taxable assets equal total assets less assets attributable to the Federal Deposit Insurance Corporation and the Federal Savings and Loan Insurance Corporation. Taxpayers then apply an allocation percentage, equivalent to the percentage used for allocating ENI. The tax rate imposed on allocated taxable assets equals:

Net Worth Ratio:*	Mortgage as a Share of Total Assets:	Tax Rate:
Less than 4%	33% or more	0.00002
At least 4% but less than 5%	33% or more	0.00004
5% or more	Any percentage	0.0001

^{*} The net worth ratio equals the taxpayer's net worth on the last day of the tax year divided by total assets on the last day of the tax year.

Taxpayers may take credits against the highest tax liability, with the exception of the \$250 minimum tax, to determine their after-credit liability. These credits include, for example, the mortgage servicing credit and the special additional mortgage recording tax credit.

Significant Tax Law Changes: 2003 and 2003

There were no significant Tax Law changes in Article 32 in 2003.

2004

2004

There were no significant Tax Law changes in Article 32 in 2004.

Statistical Summary: Comparison of 2003 Versus 2004

This section summarizes tax liability data for tax years 2003 and 2004. Tables 24 through 26 reflect summary data for four separate categories of banks and total amounts for all banks. The four categories are foreign banks, clearinghouse banks, commercial banks, and savings institutions. However, to protect taxpayer confidentiality, the clearinghouse and commercial bank categories were grouped together. Thus, each table provides statistics profiling three groups of taxpayers for the tax years 2003 and 2004.

Number of Taxpayers and Total Tax Liability

Number of Taxpayers

Table 24 reports data on the number of taxpayers in each category, the amount of their total tax liability and the percent of the bank tax paid by each category. This table shows that between 2003 and 2004, the total number of banks increased from 744 to 769. The clearinghouse/commercial bank category was the largest group of Article 32 taxpayers during this period. The number of clearinghouse/commercial banks increased from 452 in 2003 to 492 in 2004. The number of banks classified as foreign banks decreased from 200 in 2003 to 187 in 2004. The number of savings institutions also decreased, from 92 in 2003 to 90 in 2004.

Total Tax Liability

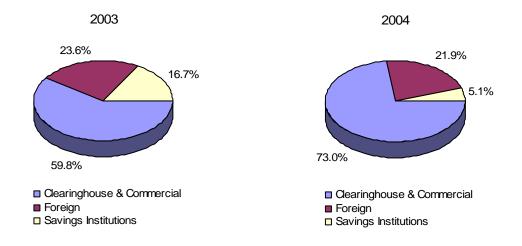

Total tax liability for Article 32 increased by approximately \$110 million, from \$396.5 million in 2003 to \$506.8 million in 2004. Clearinghouse/commercial banks and foreign banks saw increases in liability over this period, with the liability of clearinghouse/commercial banks increasing by over \$130 million. However, the liability of savings institutions declined significantly. The relative share of total tax liability represented by foreign banks and savings institutions decreased from 2003 to 2004, while clearinghouse/commercial banks made up a larger share of the tax in this year.

Table 24: Number and Total Tax Liability of Article 32 Taxpayers - 2003 and 2004								
		Number of	Total Tax	Share of				
Tax Year	Type of Bank	Taxpayers	Liability	Bank Tax				
2003	Clearinghouse & Commercial	452	\$236,992,649	59.8%				
	Foreign	200	93,383,696	23.6%				
	Savings Institutions	92	66,110,622	16.7%				
	Total	744	\$396,486,967	100.0%				
2004	Clearinghouse & Commercial	492	\$370,027,975	73.0%				
	Foreign	187	110,762,811	21.9%				
	Savings Institutions	90	26,058,403	5.1%				
	Total	769	\$506,849,189	100.0%				

Shares of Total Tax

Figure 8 shows the distribution of bank tax liability by type of bank in 2003 and 2004. The portion of bank tax liability represented by clearinghouse/commercial banks rose significantly over this period.

Figure 8: Distribution of Article 32 Tax Liability by Bank Type – 2003 and 2004

Distribution of Tax Liability by Basis of Tax

Table 25 includes statistics regarding the distribution of tax liability by basis of tax. The table lists the number of taxpayers paying on the income base, alternative bases (asset or alternative entire net income bases), and the minimum tax base, and the amount of tax liability paid under each base.

Basis of Tax

Table 25 and Figure 9 show the distribution of Article 32 tax liability by type of bank and basis of tax in 2003 and 2004. During these two years, the portion of total tax liability attributable to the income base increased from 69.8 percent to 76.1 percent. In contrast, the portion of total tax liability attributable to the alternative bases decreased from 30.2 percent to 23.9 percent. The proportion of minimum tax filer liability remained virtually unchanged between 2003 and 2004.

		Income Base		Alterna	tive Bases	Minimun	n Tax
	·	Number of		Number of		Number of	
Tax Year	Type of Bank	Taxpayers	Liability	Taxpayers	Liability	Taxpayers	Liability
2003	Clearinghouse & Commercial	210	\$161,927,514	123	\$75,009,335	119	\$55,800
	Foreign	41	49,647,762	118	43,725,689	41	10,245
	Savings Institutions	47	65,126,370	11	968,452	34	15,800
	Total	298	\$276,701,646	252	\$119,703,476	194	\$81,845

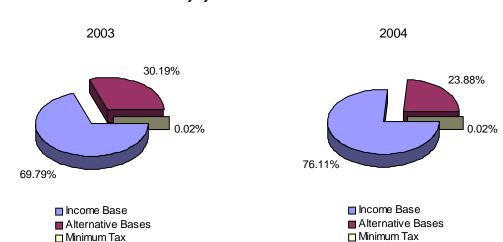

Figure 9: Distribution of Article 32 Tax Liability by Basis of Tax - 2003 and 2004

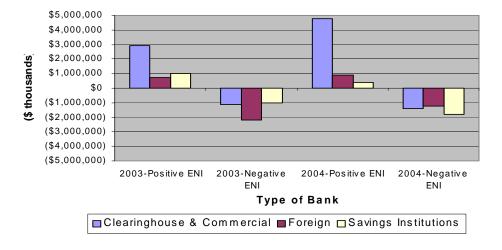

Allocated Entire Net Income

Table 26 provides data regarding the number of taxpayers with positive and negative allocated entire net income and the amount of total positive and negative allocated entire net income. These statistics indicate the number and types of banks that reported income or losses and the amount of the income and losses during the 2003 and 2004 tax years. The number of banks reporting positive allocated entire net income increased from 509 to 552. The number of banks reporting negative allocated entire net income decreased from 235 to 217.

		<u>Po</u>	sitive Allocated	ENI	<u>Nega</u>	tive Allocated E	<u>NI</u>
		Number of	Total	Average	Number of	Total	Average
Tax Year	Type of Bank	Taxpayers	(Thousands)	(Thousands)	Taxpayers	(Thousands)	(Thousands)
2003	Clearinghouse & Commercial	333	\$2,900,215	\$8,709	119	(\$1,139,679)	(\$9,577)
	Foreign	97	702,356	7,241	103	(2,164,105)	(21,011)
	Savings Institutions	79	986,621	12,489	13	(1,022,991)	(78,692)
	Total	509	\$4,589,193	\$9,016	235	(\$4,326,775)	(\$18,412)
2004	Clearinghouse & Commercial	375	\$4,759,716	\$12,693	117	(\$1,391,292)	(\$11,891)
	Foreign	102	897,450	8,799	85	(1,218,578)	(14,336)
	Savings Institutions	75	387,554	5,167	15	(1,813,366)	(120,891)
	Total	552	\$6,044,719	\$10,951	217	(\$4,423,236)	(\$20,384)

As shown in Figure 10, the amount of positive allocated entire net income reported increased from 2003 to 2004 for clearinghouse/commercial banks and foreign banks, while it decreased for savings institutions. The amount of negative allocated entire net income reported increased for clearinghouse/commercial banks and savings institutions from 2003 to 2004, while it decreased for foreign banks.

Tax Credits Used

Banks used \$56.4 million in tax credits in 2003 and \$48.7 million in 2004, although the overall number of credit users increased from 203 to 211. Table 27 provides statistics on the total number of banks that used tax credits in 2003 and 2004 and the value of the credits used during this time period.

The table displays individual data for the following credits for 2003 and 2004:

- Special Additional Mortgage Recording Tax Credit;
- Mortgage Servicing Credit;
- Investment Tax Credit for Financial Services;
- Empire Zone and Zone Equivalent Area (EZ/ZEA) Tax Credits;
- Qualified Empire Zone Enterprise (QEZE) Tax Credits;

Bank taxpayers also used the Long Term Care Insurance Credit, the Low Income Housing Credit, the Defibrillator Credit, and the Credit for Employing Persons With Disabilities in 2004. These credits are displayed under the category of "Other Credits".

As displayed in Table 27, during 2003 and 2004, the Special Additional Mortgage Recording Tax Credit was used by the greatest number of taxpayers. The number of credit users and the total value of the credit decreased over this period. The Mortgage Servicing Credit was also used by a large number of taxpayers in these years. The number of credit users and the value of the credit decreased from 2003 to 2004.

The number of credit users and the total value of the Investment Tax Credit for Financial Services decreased significantly from 2003 to 2004.

The value of the EZ/ZEA Tax Credits² decreased, although the number of taxpayers using these credits increased from 2003 to 2004. The number of credit users and the value of the QEZE Tax Credits² both increased over this period.

Table 27: Credits Used by Article 32 Taxpayers in 2003 and 2004							
	Number of (Credit Users	Amount of Credit Used				
Credit	2003	2004	2003	2004

Other Credits	4	7	26,674	180,292			
Total	203	211	\$56,380,862	\$48,727,665			

Endnotes

- 1. For an analysis of how these deductions impact tax liability, please see 2008-09 New York State Tax Expenditure Report, prepared jointly by the New York State Department of Taxation and the New York State Division of the Budget.
- 2. EZ/ZEA Tax Credits include the Empire Zone Wage Tax Credit, the Empire Zone Capital Tax Credit, and the Zone Equivalent Area Wage Tax Credit. QEZE Tax Credits include the QEZE Real Property Tax Credit and the QEZE Tax Reduction Credit.

Detailed Article 32 Summary Tables

This section contains detailed Article 32 summary tables for the 2004 tax year. Tax liability excludes the MTA surcharge.

In certain tables tax law provisions prohibit the disclosure of data. The data are included in the appropriate totals, and are designated by "d/."

Article 33: Franchise Tax on Insurance Corporations

Tax Structure: Tax Law as of 2004 New York imposes a franchise tax on insurance corporations under Article 33 of the Tax Law. There are two components of the tax: (1) an income tax based on the higher of four bases plus a tax on subsidiary capital; and (2) a tax based on gross direct premiums written on risks or residents located in the State. Life insurance corporations are subject to both the income tax component and the premiums tax. Non-life insurance corporations are subject only to the tax on premiums.

The income tax component is based on one of four alternative bases. The total income tax equals the alternative that results in the largest tax, plus an additional 0.08 percent tax on subsidiary capital allocated to New York. The four bases are:

- 7.5 percent of allocated entire net income; or
- 1.6 mill on allocated business and investment capital; or
- 9 percent of entire net income plus officers' salaries less specified deductions (alternative base); or
- A fixed dollar minimum tax of \$250.

The second component of the Article 33 franchise tax is a tax on gross premiums, less return premiums thereon, written on risks located or resident in New York. The rate of the tax on premiums varies according to the type of risk covered by a premium. However, accident and health premiums are taxed at different rates dependent on the type of insurer. A 0.7 percent tax rate applies to all premiums written by life insurance corporations, including premiums on accident and health contracts. A 1.75 percent tax rate applies to premiums on accident and health contracts written by non-life insurance corporations. A 2.0 percent tax rate applies to all other premiums written by non-life insurers.

Life insurance corporations doing business within and without the State allocate the entire net income, capital and alternative bases to New York

based on the ratios of premiums and wages, earned or paid in New York to those earned or paid everywhere. Premiums are weighted nine times, wages once.

In computing tax before credits, life insurance corporations add the tax on gross premiums to the highest of the four alternative taxes. The limitation on tax provides that the total of the two components cannot be greater than 2 percent of taxable premiums. The floor limitation provides that the total of the two components cannot be less than 1.5 percent of taxable premiums.

Empire Zone and Zone Equivalent Area (EZ/ZEA) tax credits must be taken after the floor limitation is applied but before the limitation on tax is applied. All other credits may be applied against the tax due after these limitations. Certain taxpayers may report tax due before the limitations, but have a limitation on tax of zero, and so report zero tax before credits

Tax before credits for non-life insurance corporations is the higher of the tax on gross premiums or a fixed dollar minimum tax of \$250.

Major changes to the structure of the franchise tax on insurance corporations were enacted as part of the 2003-04 State Budget. See Significant Tax Law Changes in 2003 on the next page and Appendix A for more details.

Significant Tax Law Changes: 2003 and 2004

2003

- The income tax component of the franchise tax was eliminated for non-life insurance corporations. The rate of tax on accident and health premiums received by non-life insurers was increased from 1 percent to 1.75 percent, and the rate of tax on other premiums received by non-life insurers was increased from 1.3 percent to 2 percent. The limitation on tax was also repealed for non-life insurers. These changes were effective for taxable years beginning on or after January 1, 2003.
- A floor limitation was added for life insurance corporations equal to 1.5 percent of taxable premiums effective for taxable years beginning on or after January 1, 2003.

2004

There were no significant Tax Law changes in Article 33 in 2004.

Statistical Summary: Comparison of 2003 Versus 2004

This section provides tax return data for the 2003 and 2004 tax years. The tables generally provide statistics for three separate categories of insurance corporations and for all insurance corporations. The three categories are life insurance corporations, property and casualty insurance corporations, and other insurance corporations (non-life insurers such as accident and health, title, mortgage, financial guaranty, and reciprocal insurers).

Number of Taxpayers and Total Tax Liability

Number of Taxpayers

Table 34 shows the number of taxpayers subject to Article 33 in 2003 and 2004, as well as total tax liability. The overall number of taxpayers increased by 37 from 2003 to 2004. Each of the three category of insurers increased in number.

Total Tax Liability

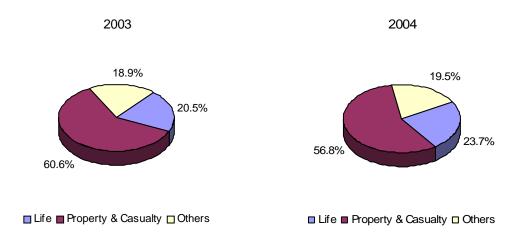

Total tax liability increased by approximately \$70 million from 2003 to 2004. Life insurers experienced the largest increase in total liability, more than \$40 million. Liability for property and casualty insurers increased by almost \$10 million, while liability for other non-life insurers increased by almost \$20 million.

Table 34: Artic	le 33 Total Tax Liability - 2003 and 2004			
		Number of	Total	Share of Total
Tax Year	Insurance Category	Taxpayers	Tax Liability	Tax Liability
2003	Life	197	\$165,652,288	20.5%
	Property & Casualty	852	490,162,673	60.6%
	Others	83	153,114,278	18.9%
	Total	1,132	\$808,929,239	100.0%
2004	Life	214	\$208,433,047	23.7%
	Property & Casualty	869	498,884,856	56.8%
	Others	86	171,721,015	19.5%
	Total	1,169	\$879,038,918	100.0%

Shares of Total Tax

Figure 11 shows the distribution of insurance tax liability by type of bank in 2003 and 2004. The portion of insurance tax liability represented by property & casualty insurers declined over this period, while that of the other two categories increased.

Figure 11: Distribution of Article 33 Tax Liability by Type of Insurer – 2003 and 2004

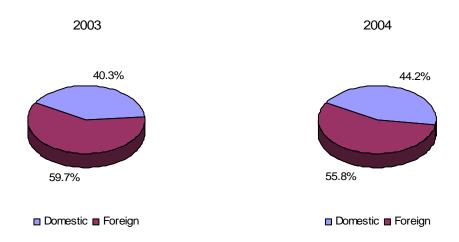

Tax Liability by Domicile

Table 35 shows the breakdown of Article 33 taxpayers by domicile. The table shows that foreign insurers accounted for nearly three-quarters of the total number of Article 33 taxpayers in both 2003 and 2004. The greatest ratio of foreign to domestic insurers occurred in the category of property and casualty. In both years, the number of foreign insurers in each of the three categories exceeded the number of domestic insurers. Liability for foreign property and casualty insurers was much greater in both years than for domestics. Domestic insurers represented most of the liability for the other two categories of insurer.

Figure 12 shows that foreign insurers also represented the majority of total tax liability in 2003 and 2004, accounting for close to sixty percent of liability in both years.

		Number of	Liability of	Number of	Liability of
		Domestic	Domestic	Foreign	Foreign
Tax Year	Insurance Category	Companies	Companies	Companies	Companies
2003	Life	93	\$91,314,167	104	\$74,338,121
	Property & Casualty	170	100,018,890	682	390,143,783
	Others	35	134,906,564	48	18,207,714
	Total	298	\$326,239,621	834	\$482,689,618
2004	Life	95	\$123,727,644	119	\$84,705,403
	Property & Casualty	165	112,128,504	704	386,756,352
	Others	35	152,428,291	51	19,292,724
	Total	295	\$388,284,439	874	\$490,754,479

Figure 12: Distribution of Article 33 Tax Liability Between Domestic and Foreign Insurers - 2003 and 2004

2004 Corp Tax Stat Report Page 71

Tax Liability for Life Insurers

Number of Taxpayers and Liability by Basis of Tax

Table 36 presents data for the tax liability of life insurers in 2003 and 2004 by basis of tax.

The table shows that in both 2003 and 2004 about half of life insurers determined their tax liability on the entire net income base. More than one quarter of life insurers paid on the alternative and capital bases in each of these years as well. Life insurers paying on the fixed dollar minimum tax base also constituted a significant portion of the population.

The portion of total tax liability for life insurers paying on the entire net income base rose significantly, from 69 percent in 2003 to 84 percent in 2004. The portion of total tax liability from the alternative and capital bases dropped by half from 2003 to 2004. The fixed dollar minimum tax base accounted for less than one percent of total tax liability in each year. Total tax liability increased by about \$43 million from 2003 to 2004, largely due to an increase in liability for taxpayers on the entire net income base.

Although for reasons of confidentiality data for the alternative base is grouped together with the capital base, the capital base accounts for virtually all taxpayers and tax liability in this combined category for 2003. There were no taxpayers on the alternative base in 2004.

		Number of	Total	Share of Total
Tax Year	Basis of Tax	Taxpayers	Tax Liability	Tax Liability
2003	Entire Net Income	100	\$114,078,476	68.87%
	Minimum Tax	41	110,923	0.07%
	Alternative and Capital Taxes	56	51,462,889	31.07%
	Total	197	\$165,652,288	100.00%
2004	Entire Net Income	111	\$175,417,678	84.16%
	Minimum Tax	47	169,858	0.08%
	Alternative and Capital Taxes	56	32,845,511	15.76%
	Total	214	\$208,433,047	100.00%

Tax Liability for Non-life Insurers

Number of Taxpayers and Liability by Basis of Tax

Table 37 shows total tax liability for property and casualty and other non-life insurers in 2003 and 2004 by basis of tax. The table shows that taxpayers that paid on the premiums tax base represented a large portion of the total number of taxpayers for both categories of insurer. Taxpayers on the premiums base also represented nearly all the total tax liability. The total number of property and casualty insurers was about ten times the number of other non-life insurers, and represented three times the total tax liability.

		Property & Casualty		01	thers
	_	Number of	Total	Number of	Total
Tax Year	Basis of Tax	Taxpayers	Tax Liability	Taxpayers	Tax Liability
2003	Premiums	555	\$490,088,423	55	\$153,107,278
	Minimum Tax	297	74,250	28	7,000
	Total	852	\$490,162,673	83	\$153,114,278
2004	Premiums	587	\$498,814,859	53	\$171,712,765
	Minimum Tax	282	69,997	33	8,250
	Total	869	\$498,884,856	86	\$171,721,015

Premiums Based Tax

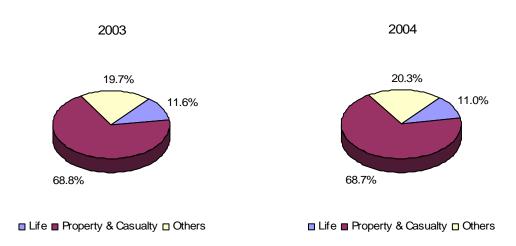

Amounts and Shares of Tax by Insurance Category

Table 38 and Figure 13 present data for the premiums based component of the Article 33 tax, which is paid by all insurers. The number of taxpayers with premiums tax liability went up slightly from 2003 to 2004, as did the total amount of taxable premiums. The total premiums tax went up by more than \$50 million over these years, with each category of insurer experiencing an increase.

The share of total premiums tax for each insurance category remained relatively the same from 2003 to 2004. Property & casualty insurers paid nearly 70 percent of the premiums tax in both years.

		Number of			Share of
Tax Year	Insurance Category	Taxpayers	Taxable Premiums	Premiums Tax	Premiums Tax
2003	Life	144	\$13,284,293,162	\$92,990,044	11.6%
	Property & Casualty	579	27,673,367,081	551,940,189	68.8%
	Others	57	8,710,769,055	157,808,517	19.7%
	Total	780	\$49,668,429,298	\$802,738,750	100.0%
2004	Life	149	\$13,497,584,165	\$94,483,081	11.1%
	Property & Casualty	613	29,444,806,269	587,354,127	68.7%
	Others	54	9,605,157,365	173,320,965	20.3%
	Total	816	\$52,547,547,799	\$855,158,173	100.0%

Figure 13: Distribution of Article 33 Premiums Tax Amounts by Type of Insurer – 2003 and 2004

Tax Before the Limitations for Life Insurers

Amounts and Shares of Tax by Basis of Tax

Table 39 shows the composition of tax before the limitations for life insurers by basis of tax liability. The table shows that in both 2003 and 2004, the income based component of the tax made up a majority of the total tax before the limitations. The amount of income tax increased by almost \$100 million from 2003 to 2004, while the amount of premiums tax increased by only a small amount. This contributed to a large overall increase in total tax before the limitations. In both 2003 and 2004, the vast majority of both the income tax and premiums tax was paid by life insurers on the entire net income base.

The overall portion of tax due before the limitations attributable to the income based tax rose from 64 percent in 2004 to 74 percent in 2004. For taxpayers on the entire net income base, the income tax made up a large portion of their tax before the limitations.

For taxpayers on the minimum tax base, the reverse was true. For taxpayers on the alternative and capital bases, the premiums tax was greater in 2003, while the income tax was greater in 2004.

		Amount of	Share of	Amount of	Share of	Total
		Income	Tax from	Premiums	Tax from	Tax Before
Tax Year	Basis of Tax	Based Tax	Income Base	Based Tax	Premiums Base	the Limitations

Limitations on Tax Before Credits for Life Insurers Effect of Limitations by Basis of Tax

Table 40 shows the effect of the floor limitation and the limitation on tax on the tax before credits of life insurers in 2003 and 2004.

A total of 58 taxpayers were subject to the floor limitation in 2004. These taxpayers were required to raise their tax by an aggregate amount of \$23 million due to the floor, a decrease of about \$5 million from 2003. Most of the effect of the floor limitation in 2004 was due to taxpayers on the entire net income tax base. A total of 125 taxpayers were subject to the limitation on tax in 2004. These taxpayers were required to lower their tax by an aggregate total of \$140 million, nearly double the amount in 2003. Most of the effect of the limitation on tax was due to taxpayers on the entire net income tax base. The net effect of the two limitations was a reduction in tax before credits of about \$117 million.

Empire Zone and Zone Equivalent Area (EZ/ZEA) credits are applied after the floor limitation but before the limitation on tax. The value of these credits for life insurers was minimal in 2003, and zero in 2004, and so their effect has not been included in the table. Disclosure provisions also prohibit listing the number of taxpayers using these credits or the amount of credit used.

Table 40: A	Article 33 Limitations on Tax Before	Credits for Life Insu	rers in 2003 and	1 2004			
		Total Tax	Floor L	imitation 1/	Limitation	on Tax 2/	Total Tax
		Before	Number of	Effect of	Number of	Value of	Before

	Alternative and Capital Taxes	42,375,403	31	9,519,053	18	14,067,792	37,826,664
	Total	\$359,317,871	58	\$22,555,823	125	\$139,791,927	\$242,081,767

^{1/} This column displays the number of taxpayers whose tax before credits was determined based on the floor limitation and the amount by which the floor increased their tax before credits. The floor limitation equals 1.5 percent of the taxpayer's taxable premiums.

Value of Tax Credits

Aggregate Values of Tax Credits¹

The number of taxpayers using credits decreased, from 368 in 2003 to 366 in 2004. The value of credits used by taxpayers grew by about \$7 million from 2003 to 2004. The use of tax credits by life insurers dropped by \$17 million over this period. Most tax credit usage is still due to property and casualty insurers, with tax credits for this category growing by \$27 million. The total Value of Tax Credits for life insurers does not include Empire Zone and Zone Equivalent Area (EZ/ZEA) credits because of the fact that these credits are applied before the limitation on tax.

Values of Individual Tax Credits

Nearly all credit usage by insurance companies is due to three credits that are specific to Article 33. The Fire Insurance Premiums Tax Credit, which is not applicable to life insurers, was the most widely used credit in 2003 and 2004. The value of this credit declined slightly in 2004. The Retaliatory Tax Credit, which may only be taken by domestic companies, had the greatest value of any credit in these years. The value of the credit grew by about \$10 million for property and casualty insurers, while declining by a little more than this amount for life insurers.

The number of credit users and the value of the CAPCO Credit decreased from 2003 to 2004. The use of this credit has grown significantly since its introduction in 1999, but declined in 2004 for the first time. There was no increase in the aggregate statewide credit limit in 2003 or 2004, as there had been in prior tax years.

^{2/} This column displays the number of taxpayers whose tax before credits was determined based on the limitation on tax and the amount by which the limitation decreased their tax before credits. The limitation equals 2.0 percent of the taxpayer's gross premiums.

For the first time since its introduction in 2001, a significant number of taxpayers took the QEZE Tax Reduction Credit in 2004. The credit was taken by seven taxpayers and had a total value of \$15 million.

Article 33 taxpayers also used the Defibrillator Credit and the QEZE Real Property Tax Credit in 2004. The value of these credits was minimal or close to minimal. However, disclosure provisions prohibit listing the number of taxpayers or the amount of credit used.

Table 41: Article 33 Value of Tax Credits - 2003 and 2004						
		Total Tax	Number of	Value of	Total	
Tax Year	Insurance Category	Before Credits	Credit Users 1/	Tax Credits	Tax Liability	
2003	Life	\$215,896,653	45	\$50,244,365	\$165,652,288	
-	Property & Casualty	552,012,506	307	61,849,816	490,162,673	
	Others	157,815,253	16	4,700,975	153,114,278	
	Total	\$925,724,412	368	\$116,795,156	\$808,929,239	
2004	Life	\$242,081,767	39	\$33,648,724	\$208,433,047	
	Property & Casualty	587,422,430	314	88,537,676	498,884,856	
	Others	173,329,029	13	1,608,018	171,721,015	
	Total	\$1,002,833,226	366	\$123,794,418	\$879,038,918	

^{1/} The number of taxpayers displayed in the "Total Credits" column reflects the number of taxpayers taking individual credits. Because taxpayers may use multiple credits, the same taxpayer may be included in this column more than once.

		Life Insurers		Propert	Property & Casualty		Others	
		Number of	Amount of Credit	Number of	Amount of Credit	Number of	Amount of Credit

	Number of	Amount of Credit
Tax Year	Credit Users	Used
2003	275	\$40,435,793
2004	273	\$40,228,215

Endnotes

Insurance companies may claim many of the same credits as other corporate taxpayers. However, the following credits are only available to insurance companies under Article 33: fire insurance premiums tax credit (Tax Law Section 1511(a)); credit against reciprocal taxes imposed by this state (Tax Law Section 1511(b)); credit relating to life insurance company guarantee fund assessments (Tax Law Section 1511(f)); retaliatory tax credits (Tax Law Sections 1511(c) and 1511(h)); credit for investment in certified capital companies (Tax Law Section 1511(k));

Detailed Article 33 Summary Tables

This section contains detailed Article 33 summary tables for the 2004 tax year. Tax liability excludes the MTA surcharge.

In certain tables Tax Law provisions prohibit the disclosure of data. The data are included in the appropriate totals, and are designated by "d/".

Appendix A: Description of Terms and Data and Data Sources

Appendix A describes selected terms and data used in the tables and charts in each tax law section, as well as the data sources used in this report.

Description of Terms and Data

Liability Year

Liability year corresponds to the corporate franchise tax return filing period. A liability year includes returns filed by taxpayers with filing periods that begin between January 1st and December 31st of the current year. For example, the 2004 liability year data used in this analysis encompasses tax years for calendar and fiscal year taxpayers with filing periods beginning January 2004 through December 2004. All Article 9 taxpayers file on a calendar year basis.

MTA Surcharge

The report does not include the 17 percent temporary franchise tax surcharge imposed on taxpayers operating in the Metropolitan Commuter Transportation District (MCTD). The MCTD includes the counties of New York, Bronx, Kings, Queens, Richmond, Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk, and Westchester. Data users cannot determine the value of the MCTD surcharge from the statistical tables because tax liability data for business activity conducted in the MCTD is not readily available. The MTA Surcharge is effective through taxable years ending before December 31, 2009.

Number of Taxpayers

This represents the actual number of tax returns filed for each tax year, although this data may not include some late filed returns. This count refers to each filing entity as a single corporation, regardless of whether the corporation files a separate return or as part of a combined group.

Tax Liability

This represents the sum of the post-credit liability for all taxpayers filing a return. Tax liability data includes the tax on subsidiary capital and the fixed dollar minimum tax for subsidiaries of combined filers. It does not include the MTA surcharge. In some tables, total dollar amounts may not equal 100 percent due to rounding.

Tax Credits Used

The credit data are limited to credits used on the taxpayer's return. They do not reflect credits earned but not used, or balances of unused credits.

Data Classification by Industry

Taxpayers are classified according to the North American Industrial Classification System (NAICS) codes¹ appropriate for their industry groups. The Internal Revenue Service (IRS) asks taxpayers to identify their Principal Business Activity using these codes for federal tax purposes. Taxpayers self-report appropriate NAICS codes on their tax returns. These codes identify the type of business activity in which the entity is engaged. However, taxpayers often fail to provide this information. NAICS coding for New York tax returns began in 1998. Previously, industries had been classified using the Standard Industrial Classification (SIC) system.

Industries are grouped by two-digit industry sectors and three and four-digit sub-sectors in this report. Only data from certain selected industry sub-sectors has been presented in this report. As a result, data presented in tables for sub-sectors may not necessarily add to the appropriate two-digit industry sector totals. NAICS coding expands into much more detail by going as far as the six-digit level. This can be highly specific by activity or product classification. For the purposes of this report, this level of detail is not required.

NAICS coding for certain three and four-digit industry sub-sectors was revised in 2002. These changes were reflected in the presentation of data for affected sub-sectors in Tables 10 and 11 of the 2002 report. Those affected include sub-sectors within the Construction, Wholesale Trade, and Information industry groups. Because of this, data for these sub-sectors will not match reports for tax years before 2002. However, data is still comparable to prior history at the two-digit industry sector level.

The associated liability is quite small for those taxpayers who cannot be identified by industry group. Because some of the taxpayer universe remains unidentified, only general comparisons can be made between industry sectors for each particular tax. This caveat applies to both the number of taxpayers and liability data.

Article 9-A: Franchise Tax on Business Corporations

Table Terms

Size of Liability

Table 9 classifies taxpayers according to the size of their tax liability. For non-minimum taxpayers, a wide range of liability groupings are displayed, from \$0-499 to \$1,000,000 and over. For fixed dollar minimum taxpayers, taxpayers are classified by minimum tax amount. The table includes those minimum taxpayers paying the \$300 maintenance fee for foreign corporations.

Tax Return Items

Certain tables include data for selected items taken from tax returns filed by corporations. Data for each tax return item is given for basis of tax, industry group, return type, and fiscal period.

Industry Group

Several tables are classified by industry group as reported by NAICS industry code. Certain caveats apply regarding corporations not included in these tables. The Finance and Insurance sector excludes banks taxable under Article 32 and insurance companies taxable under Article 33. The Utilities, Transportation and Warehousing, and Information sectors exclude public utilities, transportation companies, and telecommunications companies taxable under Article 9 of the Tax Law.

The term "Industry Code Not Given" represents those corporations whose returns did not indicate an industry code and an appropriate code could not be assigned based upon the information submitted with the returns.

Data Terms/ Descriptions

Primary Tax Base

The tax base on which the taxpayer paid, after the application of all available credits. The law includes four bases: entire net income, capital, alternative minimum taxable income, and the fixed dollar minimum. Certain tables also include data for S corporations, who are only subject to the fixed dollar minimum tax base.

"True" Minimum Taxpayers

Certain fixed dollar minimum taxpayers are classified as "true" minimum taxpayers. These taxpayers were liable only for the fixed dollar minimum tax of \$100 - \$10,000, without subsidiary capital taxes. Tables 1-12 include data for these taxpayers. Tables 13-20 do not, as income items are not verified for these taxpayers. Any taxpayers that allocate their income are not classified as true minimum taxpayers.

Tax Liability

Tax liability data are compiled in the aggregate, by sector of industry. Data includes the respective shares that each sector of industry represents in relation to all taxpayers as well as the average liability per taxpayer for each sector. Tax liability data in Tables 1-12, as well as corresponding charts, includes the fixed dollar minimum tax on subsidiaries.

Number of Taxpayers

This count refers to each filing entity as a single corporation, regardless of whether the corporation files a separate return or as part of a combined group. Data are compiled in the aggregate, by sector of industry. The data also includes the respective shares that each sector of industry represents in relation to the total number of taxpayers.

Return Type

Return filed by taxpayers. Article 9-A tables include data for the CT-3, CT-3A, and CT-4 return types.

Fiscal Period

Taxpayers are classified by the first day of their fiscal year as reported for tax purposes.

Tax Credits

Information on Article 9-A tax credits is not provided in this report. For detailed information on these credits please see *Analysis of Article 9-A General Business Corporation Franchise Tax Credits for 2004*, published by the Office of Tax Policy Analysis.

Article 9: Corporation and Utilities Tax

Table Terms

Tax Law Section

The following sections of Article 9 are included in this report. The 2004 report is the first in which data for Section 185 is included.

<u>Section 183</u> Franchise Tax on Transportation and Transmission Corporations and Associations

<u>Section 184</u> Additional Franchise Tax on Transportation and Transmission Corporations and Associations

<u>Section 185</u> Franchise Tax on Cooperative Agricultural Corporations

<u>Section 186</u> Franchise Tax on Waterworks Companies, Gas Companies, Electric or Steam Heating, Lighting and Power Companies

<u>Section 186-a</u> Gross Receipts Tax on the Furnishing of Utility Services

Section 186-e Excise Tax on Telecommunications Services

Data Terms/ Descriptions

Tax Liability

Tax liability data are shown in the aggregate, and for each selected tax section of Article 9.

Number of Taxpayers

Each taxpayer should be considered to represent a single filing entity, although the tax law allows for combination of taxpayers under Article 9. These data are shown in the aggregate, and for each selected tax section of Article 9.

Article 9 Data by Industry

For the 2004 report, the industry data for Article 9 presented in Appendix D has been revised. Data is no longer presented in separate tables for each section of law. These tables have now been consolidated into Table D3, which shows the number of taxpayers for each section of Article 9 on one table, and Table D4 which does the same for total tax liability.

Tables D3 and D4 break out Article 9 data for the seven separate industry groups which had at least fifty Article 9 taxpayers in 2004. These groups are identified based on their classification at the three-digit NAICS coding level. Industry groups which had less than fifty taxpayers at the three-digit level are combined in the category of "Other Industries."

Article 32: Franchise Tax on Banking Corporations

Table Terms

Tax Return Items

Certain tables include data for selected items taken from tax returns filed by banks. Data for each tax return item is given for basis of tax, bank type, and return type.

Clearinghouse Banks

Clearinghouse banks are financial institutions that are members of the New York Clearing House Association. As members of this association, their functions include handling daily fund exchanges from other clearinghouse banks and settling exchanges.

Foreign Banks

Foreign banks are commercial banks headquartered outside the United States or its possessions with nexus in New York State.

Savings Institutions

Savings institutions are depository financial institutions that receive deposits primarily from consumers, make mortgage and real estate loans, and invest in high-grade securities.

Commercial Banks

Commercial banks are institutions that are not classified as clearinghouse banks, foreign banks, or savings institutions. Banks included in this category are domiciled in the United States.

Data Terms/ Descriptions

Tax Liability

Tax liability data includes the respective shares of certain bank types in relation to total bank tax liability as well as the average liability per taxpayer for each bank type.

Number of Taxpayers

This count refers to each filing entity as a single bank, regardless of whether the bank files a separate return or as part of a combined group.

Alternative Bases

For confidentiality reasons, the taxable assets and alternative entire net income bases are aggregated in the tables. They are referred to in the tables as alternative bases.

Fixed Dollar Minimum Taxpayers

All tables include "true" fixed dollar minimum taxpayers. These taxpayers were liable only for the fixed dollar minimum tax of \$250, without subsidiary capital taxes.

Allocated Entire Net Income (ENI)

Allocated ENI refers to the New York portion of ENI. Taxpayers determine the amount of ENI attributable to New York using formula apportionment.

Tax Credits Used in 2003 and 2004

Table 27: Credits Used by Article 32 Taxpayers

Table 27 displays data by credit for tax credits used by Article 32 taxpayers in 2003 and 2004. Data is displayed for an individual credit if that credit is used by three or more taxpayers in both years. Credits that do not meet this requirement are grouped under the category of Other Credits. The disclosure requirements of the Tax Law prohibit displaying data attributable to less than three taxpayers. The Total line in the table includes all credit users and credit used. Prior to the 2004 report, Table 27 listed only those credits that met the disclosure requirements, and the Total line included only those credits displayed in the table.

Special Additional Mortgage Recording Tax Credit

A corporation may claim a credit for the New York special additional mortgage recording tax paid on mortgages recorded on or after January 1, 1979. Taxpayers may carry forward the unused mortgage recording tax credit to future tax years. Mortgages on certain property, such as property in the Metropolitan Commuter Transportation District and Erie County, are ineligible for the credit.

Mortgage Servicing Tax Credit

A credit is allowed for servicing mortgages acquired by the State of New York Mortgage Agency (SONYMA). The credit value varies by dwelling size and the amount of the mortgage.

Empire Zone and Zone Equivalent Area Tax Credits

Taxpayers may qualify for credits for creating jobs and investing in Empire Zones (EZs) and Zone Equivalent Areas (ZEAs). Credits available include the EZ and ZEA Wage Tax Credits, which are based on employment increases in the zones and equivalent areas. Taxpayers may also claim the EZ Capital Tax Credit, which is based on investments in zone businesses. The credits may be carried

forward indefinitely, and the wage tax credits are fifty percent refundable for new businesses.

Qualified Empire Zone Enterprise (QEZE) Tax Credits

Credits are available to taxpayers certified as Qualified Empire Zone Enterprises (QEZEs). QEZEs are business enterprises certified as Empire Zone businesses that meet an annual employment test. Available credits include the QEZE Tax Reduction Credit and the QEZE Real Property Tax Credit. These credits may be claimed for 15 years, and the Real Property Tax Credit is refundable.

Investment Tax Credit for Financial Services

A credit is allowed for equipment or buildings used in broker/dealer activity and related activities. The credit is effective for property placed in service from October 1, 1998 to September 30, 2008.

Defibrillator Credit

A credit is available for the purchase of an automated external defibrillator. The credit is equal to the cost to the taxpayer during the tax year, not to exceed \$500 per purchase.

Credit for Employment of Persons With Disabilities

A credit is available for taxpayers who employ individuals with disabilities. The credit equals 35 percent of the first \$6,000 of first year wages paid, up to a maximum of \$2,100 per employee.

Long Term Care Insurance Credit

A taxpayer may take a credit equal to 20 percent of the premiums paid for a long-term care insurance policy, as defined in the Insurance Law. Any unused credit may be carried forward.

Low Income Housing Credit

A taxpayer may take a credit for a long-term commitment to low income housing, depending on the applicable percentage of the qualified basis of each building. The credit is claimed is claimed at 10 percent per year over ten years. Any unused credit may be carried forward. The aggregate statewide total credit available in 2004 was \$4 million.

Article 33: Franchise Tax on Insurance Corporations

Issues with Table Data

Major changes to the structure of the Article 33 Franchise Tax on Insurance Corporations took effect for the 2003 tax year. The income tax component was eliminated and the premiums tax rates raised for non-life insurers, while life insurers were made subject to a floor limitation on tax.

Because of these changes, table data presented in the main body of this report for the 2003 and 2004 tax years will not be comparable to table data presented in prior reports for tax years before 2003. Historical tables included in Appendix D present data according to the tax structure in existence before 2003, and may be compared to the historical tables presented in prior reports.

Table Terms

Tax Return Items

Certain tables include data for selected items taken from tax returns filed by insurers. Data for each tax return item is given for basis of tax and type of insurer.

Life Insurance Companies

Life insurance companies include companies authorized by the Superintendent of Insurance to conduct an insurance business consisting of either insuring the lives of human beings or providing annuity contracts.

Officers and employees of savings banks may be authorized by the Superintendent of Insurance to negotiate, order, solicit, or procure applications or orders for life insurance or annuity contracts. Data for these taxpayers is presented under the category of life insurers.

Property and Casualty Insurance Companies

Property and casualty insurance companies include companies authorized by the Superintendent of Insurance to write insurance against the loss of, or damage to, property.

Others

This category includes insurance companies authorized by the Superintendent of Insurance to write accident and health, title, mortgage, financial guaranty, or reciprocal insurance.

Data Terms/ Descriptions

Number of Taxpayers

This count refers to each filing entity as a single insurance company, regardless of whether the company files a separate return or as part of a combined group.

Tax Liability

Tax liability is shown for the three general categories of insurance companies, as well as by basis of tax. Total tax liability represents tax due after the application of the limitations on tax for life insurers and the application of tax credits.

Basis of Tax

This is the basis on which total tax liability is determined, after the application of all available credits. The four bases for life insurers are allocated entire net income, allocated business and investment capital, the alternative tax calculation, and the fixed dollar minimum tax. For reasons of confidentiality, the alternative and capital bases have been grouped together. The two bases for non-life insurers are premiums and the fixed dollar minimum tax.

The basis of tax after credits shown in the tables may not be the same as the basis of tax before credits. This is because taxpayers which have determined tax before credits on a base other than the fixed dollar minimum amount may use credits to lower their liability to the minimum tax. These taxpayers are considered to have paid on the fixed dollar minimum tax base after credits.

Domestic Companies

Domestic insurance companies are companies incorporated or organized in New York State

Foreign Companies

Foreign insurance companies are companies incorporated or organized in any jurisdiction other than New York State.

Taxable Premiums

For 2004, data has been added on the amount of taxable premiums of Article 33 taxpayers. Taxable premiums include gross direct premiums written on risks in New York State, minus return premiums, reinsurance premiums, and dividends paid or credited.

Income Based Tax

This is the tax based on income paid by life insurance companies on the highest of the four bases. It also includes the tax on subsidiary capital.

Premiums Based Tax

This is the tax based on New York premiums paid by all insurance companies.

Tax Before the Limitations

Total tax before the limitations is the sum of the income based tax and the premiums based tax. It is the total tax for life insurance companies before the statutory limitations are applied.

Limitations on Tax

The statutory limitations on tax affect the computation of tax before credits for life insurance companies. Without the limitations, tax before credits would simply equal the sum of the income and premiums based taxes. The limitation on tax provides that the total of these two components cannot be greater than 2 percent of taxable premiums. The floor limitation provides that the total of the two components cannot be less than 1.5 percent of taxable premiums. These limitations, if applicable, serve to either lower or raise the amount of tax due before credits.

Tax Credits Used in 2003 and 2004

Tax Before Credits

For life insurers, total tax before credits equals the tax after the limitations are applied. For non-life insurers, total tax before credits equals the higher of the premiums or fixed dollar minimum tax bases.

Credit for Investment in Certified Capital Companies

Taxpayers may claim a credit for 100 percent of investments in Certified Capital Companies (CAPCOs). CAPCOs are for-profit venture capital firms that invest directly in small-to-mid-size businesses. The credit is claimed at a rate of 10 percent per year over a ten year period. For the 2004 report, the category of "Other" insurers has been added to Table 41A, which displays data for this credit by type of insurer.

Fire Insurance Premiums Tax Credit

Taxpayers may take a credit for additional taxes on premiums written by corporations organized in another state or country for any insurance against loss or damage by fire, paid by foreign fire insurance companies and foreign mutual fire insurance companies. These taxes are imposed under the Insurance Law. Unused credits may not be carried forward.

Retaliatory Tax Credit

Taxpayers domiciled or organized in New York may take a credit for up to 90 percent of any retaliatory taxes paid to other states as a result of New York State-imposed taxes on insurers domiciled or organized in those states. Taxpayers may elect to have the unused credit refunded or carried forward to future tax years. For the 2004 report, the category of "Other" insurers has been added to Table 41A, which displays data for this credit by type of insurer.

Investment Tax Credit for Insurers

A credit is allowed for equipment or buildings used in broker/dealer activity and related activities. The credit is effective for property placed in service from October 1, 1998 to September 30, 2008.

Empire Zone and Zone Equivalent Area Tax Credits

Taxpayers may qualify for credits for creating jobs and investing in Empire Zones (EZs) and Zone Equivalent Areas (ZEAs). Credits available include the EZ and ZEA Wage Tax Credits, which are based on employment increases in the zones and equivalent areas.

Taxpayers may also claim the EZ Capital Tax Credit, which is based on investments in zone businesses. The credits may be carried forward indefinitely, and the wage tax credits are fifty percent refundable for new businesses. EZ/ZEA tax credits for life insurers must be taken before the limitations are applied. All other credits may be applied against the tax due after the limitation.

Qualified Empire Zone Enterprise (QEZE) Tax Credits

Credits are available to taxpayers certified as Qualified Empire Zone Enterprises (QEZEs). QEZEs are business enterprises certified as Empire Zone businesses that meet an annual employment test. Available credits include the QEZE Tax Reduction Credit and the QEZE Real Property Tax Credit. These credits may be claimed for 15 years, and the Real Property Tax Credit is refundable.

Defibrillator Credit

A credit is available for the purchase of an automated external defibrillator. The credit is equal to the cost to the taxpayer during the tax year, not to exceed \$500 per purchase.

Credit for Employment of Persons With Disabilities

A credit is available for taxpayers who employ individuals with disabilities. The credit equals 35 percent of the first \$6,000 of first year wages paid, up to a maximum of \$2,100 per employee.

Data Sources

Changes in Data File Definitions in 2002

A significant change was made in 2002 to the definition of the data files compiled for Articles 9-A, 32, and 33. Beginning with the 2002 tax year, the files are comprised of taxpayers whose filing period beginning date is 2002. Data files for tax years before 2002 were comprised of taxpayers whose file period end date was between December of one year and November of the following year. This change was made for two reasons. First, the definition is more straightforward and treats all taxpayers in a particular year in the same way. Second, and more importantly, the old definition allowed for the inclusion of a short period return when a full year return was already in the file. This practice dramatically overstated the value of stock variables such as assets and credit carry forward.

This file definition change created a one year shift of approximately 1,500 taxpayers from the 2002 to the 2003 data files. Statistical information regarding these taxpayers is available upon request. In future data files, a composite return may be created that will handle the overstating of stock variables.

Article 9-A (C Corporations)

Tax statistics provided in this section of the report come from the Article 9-A Office of Tax Policy Analysis (OTPA) Study File and Minimum Tax File. These files include data collected from Article 9-A corporate franchise tax returns for the liability year to which the study and minimum tax files pertain. These data files include all timely filed and amended returns available at the time the study file is created. Although the presented data are prior to audit, OTPA staff may adjust taxpayer provided information for items failing the Office's verification program.

Article 9-A data presented in this report for the 2003 tax year will not match with 2003 data presented in the previously published report. This is due to the availability of enhanced data sources for the 2003 tax year. The enhanced data files include those taxpayers that filed for the 2003 tax year subsequent to the development of the data files used as the basis for the 2003 report. For 2003, the enhanced data represents an additional 4,410 taxpayers and an additional \$21.7 million in tax liability.

Article 9-A (S Corporations)

The data come from the Department of Taxation and Finance's Corporation Master Files. A contracted processing bank provided the original data. These data are not subject to the Office's verification procedures. Therefore, these data are less reliable than that available from OTPA's other tax liability study files. Also, these data are extracted from the Department's Master File, as the file existed at a point in time, and may not include audit adjustments or amended or late filed returns.

Articles 9, 32, and 33

All tax statistics provided in this section of the report come from the Office of Tax Policy Analysis (OTPA) Study File for the Article. This study file includes data collected from franchise tax returns for the liability year to which the study file pertains. This data file includes all timely filed and amended returns available at the time the study file is created. Although the presented data are prior to audit, OTPA staff may adjust taxpayer provided information for items failing the Office's verification program.

Appendix B: Tax Rate Changes in 2003 and 2004

Table B1: Reduction in Rate of Tax Under Section 186-a of Article 9

Appendix B lists the changes in business tax rates effective in 2003 and 2004. The tables are organized by business tax type. There were eleven rate changes effective in business taxes in these two years.

Article 9:	
Corporation	
and Utilities Tax	

	Tax on Gross Income-Receipts from Transportation and Distribution	Tax on Gross Income- Receipts from Commodities Charges	Tax on Gross Operating Income
Rate for taxable years beginning on or after January 1, 2002	2.4%	1.9%	1.9%
Rate for taxable years beginning on or after January 1, 2003	2.25%	0.85%	0.85%
Rate for taxable years beginning on or after January 1, 2004	2.125%	0.4%	0.4%

Article 9-A: Franchise Tax on General Business Corporations

Table B2: Reduction in Rate of Tax on Entire Net Income for Small Business Taxpayers with ENI of
\$200,000 or less

Rate for taxable years beginning after June 30, 2001 and before July 1, 2003

7.5%

Rate for taxable years beginning on or after July 1, 2003

6.85%

Table B3: Reduction in Rate of Tax on Entire Net Income for Small Business Taxpayers with ENI of more than \$200,000 but not more than \$290,000

Rate for taxable years beginning after June 30, 2001 before July 1, 2003 7.5%

Rate for taxable years beginning on or after July 1, 2003

\$13,700, plus 7.5% of amount over \$200,000, plus 3.25% of amount over \$250,000

Table B-4: Restructuring of Fixed Dollar Minimum	Tax Rates for Article 9-A Taxpayers
--	-------------------------------------

Taxable v	ıears l	beainnina	hefore	lanuary	1 1 20	004

Article 33: Franchise Tax on Insurance Corporations

Table B5: Increase in Rate of Tax on Accident and Health Premiums Received by Non-life Insurers Under Article 33

Rate for taxable years beginning before January 1, 2003	1.0%
Rate for taxable years beginning on or after January 1, 2003	1.75%

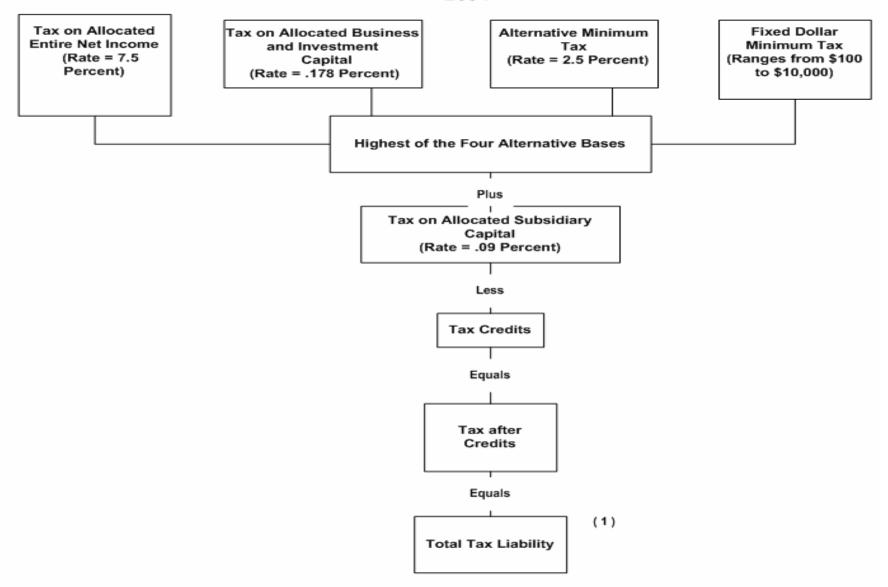

Table B6: Increase in Rate of Tax on Other Premiums Received by Non-life Insurers Under Article 33				
Rate for taxable years beginning before January 1, 2003	1.3%			
Rate for taxable years beginning on or after January 1, 2003	2.0%			

Page B-2 2004 Corp Stat Report

Appendix C: Descriptive Charts of the Calculation of Tax Liability for Articles 9-A, 32 and 33

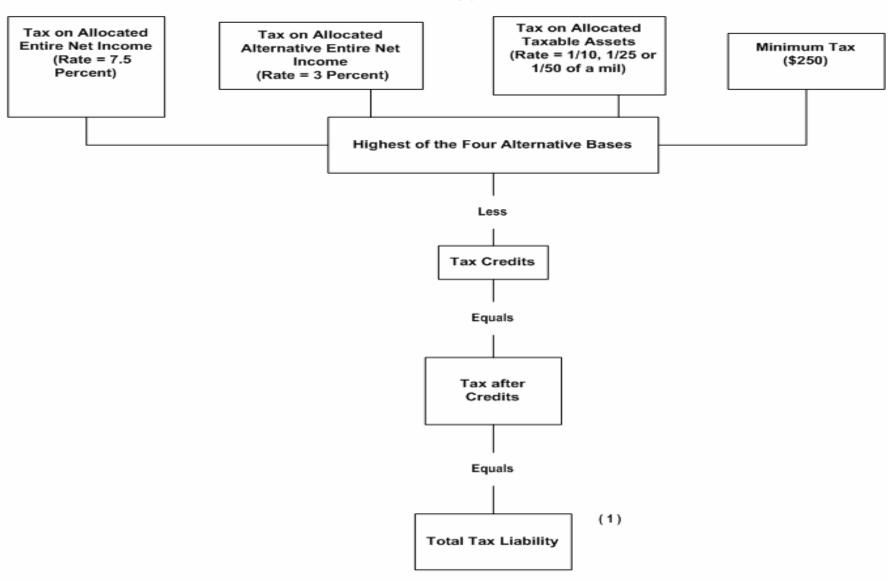

Appendix C contains descriptive charts of the calculation of tax liability for Articles 9-A, 32 and 33. The charts (except where noted) reflect the Tax Law as of January 1, 2004. Article 9 has not been included due to its complexity and the taxation of different sections under the Tax Law. For more information on the taxation of these Articles, see *New York State Tax Sourcebook* issued by the Office of Tax Policy Analysis.

Corporation Franchise Tax on General Business Corporations Article 9-A 2004

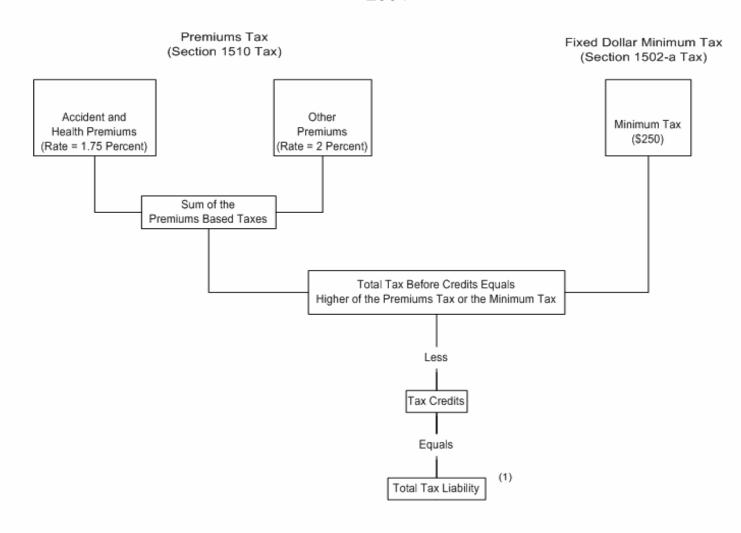

(1) Corporations doing business in the Metropolitan Commuter Transportation District (MCTD) are subject to a 17 percent surcharge on the portion of total tax liability allocable to activities within the MCTD.

Corporation Franchise Tax on Banking Corporations Article 32 2004

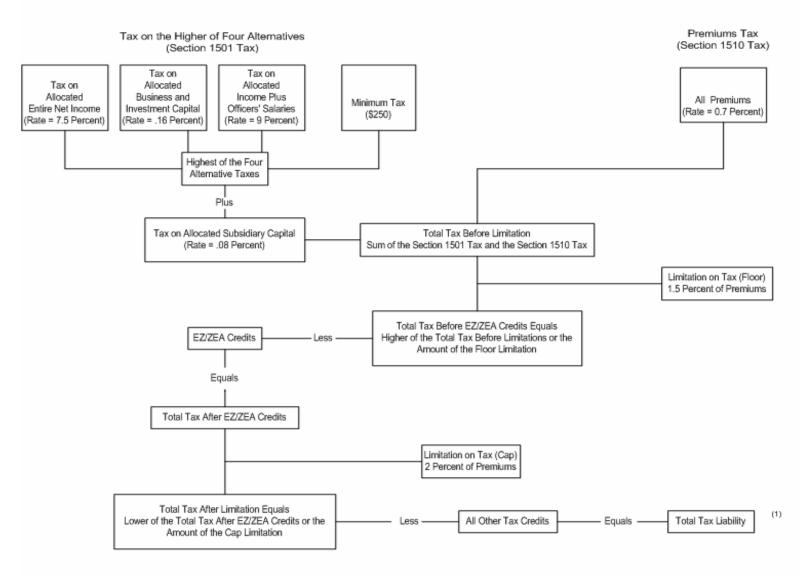

(1) Corporations doing business in the Metropolitan Commuter Transportation District (MCTD) are subject to a 17 percent surcharge on the portion of total tax liability allocable to activities within the MCTD.

Corporation Franchise Tax on Non-Life Insurance Companies Article 33 2004

Corporation Franchise Tax on Life Insurance Companies Article 33 2004

Corporations doing business in the Metrolpolitan Commuter Transportation District (MCTD) are subject to a 17 percent surcharge on the portion of the total tax liability allocable to activities within the MCTD.

Appendix D: Historical Tables Accompanying This Report

This appendix contains four sections of selected historical tables and charts which were presented in this report previously. The historical tables are presented for tax years 2000-2004 for Articles 9-A and 32, and 2000-2002 for Article 33. Only 2004 data is presented for Article 9. See Appendix A for details.

Table D1: Distribution of C Corporation Taxpayers by Industry - 2000-2004							
	Number of Taxpayers						
Industry	2000	2001	2002	2003	2004

^{1/} This column displays the number of taxpayers whose tax before credits was determined based on the limitation on tax and the amount by which the limitation decreased their tax before credits. The limitation equals 2.0 percent of the taxpayer's gross premiums for life insurers and 2.2 percent for all other insurers.

^{2/} The number of taxpayers displayed in the "Total Credits" column reflects the number of taxpayers taking individual credits. Because taxpayers may use multiple credits, the same taxpayer may be included in this column more than once.

Appendix E: Sources of Tax Return Data

Appendix E lists the sources of tax return data used by the Office of Tax Policy Analysis (OTPA) in compiling the study files for Articles 9-A, 32 and 33 for the 2004 tax year. Tax return line items for which data is presented in this report are listed along with the associated line on the 2004 tax return(s). See Appendix A for more information on data sources.
