## Introduction

Article 29 of the Tax Law authorizes counties, cities and some school districts to impose a local sales tax as a complement to the statewide tax. This report presents statistical information on taxable sales and purchases subject to the county and New York City (NYC) sales tax. Taxable sales include nearly all retail sales of tangible personal property and certain services. Taxable purchases represent the value of tangible personal property or services purchased for use in business operations (which would otherwise be subject to tax) on which no sales tax was previously paid.

This report presents county taxable sales and purchases subject to the county sales tax. For the most part, the tangible property and services that are taxed by counties are also taxed by New York State. This data is reported in separate statistical tables as the state tax base in order to provide a more accurate measure of the State's taxable sales and a more consistent comparison of the taxable sales trends of counties. However, counties also tax some tangible property and services that are exempt from the state sales tax such as residential energy sales and local clothing taxable sales. The taxation of these items varies by county. The taxable sales of these items are presented in a separate table of the local tax base. The following items are exempt from the state sales tax, and are in the local sales tax base for certain counties:

- Clothing and footwear costing less than $\$ 110$;
- Consumer utility and fuel taxes for residential energy;
- Fuel and utility services and farming services (New York City only);
- Other NYC services (parking services, hotel room occupancy services, cleaning and maintenance services, credit rating and reporting services, miscellaneous personal services, protective and detective services, interior decorating and design services);
- Sales to a Qualified Empire Zone Enterprise (QEZE) eligible for exemption; and
- Consumer's utility tax for telephone services, telephone answering services, and telegraph services.

Unless separately stated, the statistical tables and figures in this publication are based on both the state and local tax bases.

Data presented herein are derived from vendor and purchaser information reported on New York State sales tax returns. The report displays the data for all counties combined statewide, New York City, all counties outside the City, and each county separately. This publication presents (1) five year annual trends, (2) state and local tax base trends by industry for the two most recent annual selling periods, and (3) county trends by region. Data for the March 2000 through February 2001 selling period are revised from the last report. Data for the March 2001 through February 2002 selling period are preliminary and will be revised in our next report.

On March 1, 2000, the State's permanent sales and use tax exemption on clothing items and footwear costing less than $\$ 110$ went into effect. This exemption does not apply to any locally imposed sales and use taxes unless the county or city imposing those taxes elected to provide for it. As of March 1, 2001, sixteen counties and New York City had elected to exempt locally imposed sales and use taxes. Appendix D shows the counties that elected to exempt the locally imposed sales and use taxes and the rates imposed by those counties not electing to exempt local sales tax.

On May 15, 2000, Chapter 63 of the Laws of 2000 was enacted. This legislation amended the Tax Law to provide certain tax benefits under the new "Empire Zones Program Act" which is applicable to the New York State and local sales and compensating use taxes, as well as to certain other taxes. Beginning March 1, 2001, certain purchases and uses of tangible personal property and services by a Qualified Empire Zone Enterprise (QEZE) are exempt from the New York State four percent sales and use tax. These exemptions do not apply to any locally imposed sales and use taxes unless the county, city, or school district imposing those taxes elects to provide the exemptions.

# Annual Sales and Purchases 

Table 1 summarizes annual sales and purchases subject to use tax for the state and local tax base for all New York counties during the past five years. With the exception of the most recent annual selling period, annual sales have grown each year when compared with sales reported for the previous year. Preliminary data for March 2001 through February 2002 indicates that reported sales declined by $\$ 4.0$ billion to $\$ 213.7$ billion, which is a 1.9 percent drop from the previous year.

* Preliminary
** Revised
Figure 1 depicts that the March 2001-February 2002 selling period did not continue the upward trend of annual sales that has been underway since the March 1997 through February 1998 selling period. The decrease in taxable sales and purchases is directly related to the impact of the national recession, the decline in financial markets and the World Trade Center disaster.

Figure 1: Statewide FiveYear Trend (in Billions)

Industry Analysis

Table 2 provides a look at statewide annual total taxable sales and purchases by industry for the state tax base. Taxable sales and purchases for the March 2001 through February 2002 annual selling period reached $\$ 196.9$ billion. This amount fell below the total reported for the previous year's comparable twelve-month selling period by 1.0 percent ( $\$ 2.0$ billion).

Statewide, five of the major industries realized year-over-year growth for the latest annual selling period. There were no significant increases, but modest increases were noted in the arts, entertainment, and recreation ( 3.3 percent); retail trade ( 1.9 percent); information (1.9 percent); health care ( 1.2 percent); and utilities ( 0.9 percent) industries. The largest decreases in industry sales occurred in wholesale trade ( -10.9 percent); manufacturing ( -10.1 percent); and professional, scientific, and technical services ( -8.6 percent).

Retail sales accounted for 46.7 percent of the taxable sales and purchases in the state tax base, contributing $\$ 92.0$ billion to the statewide total. During this most recent selling period, retail sales rose 1.9 percent from the previous year. Gains and losses in the retail trade industry were evenly split with six sectors realizing growth, ranging from 1.7 percent for furniture and home furnishings to 7.0 percent for motor vehicles and parts. Six sectors experienced decreases in reported sales within retail trade. The clothing sector (-7.4 percent) experienced the greatest decline, followed by miscellaneous retail (-5.9 percent); nonstore retail (-3.3 percent); and electronics and appliances ( -2.7 percent).

| Table 2: Statewide Annual State Tax Base Industry Totals (In Thousands) |  | Selling Period |  |  |

Figure 2: Statewide Industry Shares for the State Tax Base in the 3/01-2/02 Selling Period

Figure 2 shows the statewide share of taxable sales and purchases contributed by major industry for the state tax base in the latest selling period. Retail trade and accommodation and food services continue to be the two largest sources of State taxable sales and purchases. Combined, they contribute more than 58.1 percent of the State total.

Table 3 provides a look at the statewide annual industry totals for the local tax base portion of taxable sales and purchases. These are taxes imposed only at the county or New York City level and are exempt from state tax. Taxable sales and purchases for the March 2001 through February 2002 selling period decreased by 10.8 percent. Taxable sales and purchases reported from the 1.5 percent sales tax on residential energy, coupled with the taxable sales and purchases realized by the clothing sector, contributed 89.1 percent to the statewide local tax base.

N/A - Data is only applicable to one selling period
1/ Includes parking services, hotel room occupancy services, cleaning and maintenance servcies, credit rating and reporting services, miscellaneous personal services, protective and detective services, and interior decorating and design services.

# County Trends by Region 

Nearly two thirds of the State's counties showed year-over-year gains in taxable sales and purchases. Figure 3 provides a glimpse of county sales activity trends by region. As shown, year-over-year gains were widely dispersed throughout the State.

Table 4 indicates that three counties surpassed five percent growth in total taxable sales and purchases for the March 2001 through February 2002 period as compared with the previous year. Schoharie county ( 8.7 percent) experienced the most growth in taxable sales and purchases, followed by Putnam (6.1 percent) and Saratoga (6.0 percent) counties.

Schoharie county reported gains in about half of its major industry sectors. The most significant percent gain was in the information industry ( 90.1 percent) where significant increases in taxable sales were reported by network communications in the second and third quarters. Schoharie county also realized growth in its retail industry, where sizeable increases in taxable sales and purchases were reported in the clothing, building materials and garden equipment, gasoline stations, and the general merchandise sectors.

Putnam county was the only county to realize gains in all of its major industry groups, with the most notable percentage increases reported for the manufacturing ( 15.0 percent), information (11.1 percent), and construction (10.6 percent) industries. Other services reported an increase of 8.9 percent.

Gains reported by the retail trade industry were the major source of Saratoga county's 6.0 percent increase in taxable sales and purchases. Much of this gain was realized in the motor vehicle and parts (9.6 percent), clothing - local tax base ( 18.5 percent), gasoline stations ( 15.6 percent), and general merchandise ( 15.0 percent) sectors. The only sector in retail trade to see a slight decline was the food and beverage ( -.5 percent) sector. In spite of the strength in the retail trade industry, wholesale sales declined by 10.3 percent. Saratoga county also experienced substantial growth in the food services (7.6 percent) sector in the accommodation and food services industry.

Jefferson county experienced the most significant decline in taxable sales and purchases when compared to the previous annual selling period. This decline ( -7.4 percent) appears to be mainly attributable to a decrease in taxable sales and purchases in the retail trade industry. Jefferson county, along with Rensselaer county, elected to exempt the locally imposed sales and uses tax effective March 1, 2001. In doing so, they joined New York City and the fourteen other counties that have allowed for this exemption. (See Appendix D.)

New York City The five New York City counties of the Bronx, Kings, New York (Manhattan), Queens and Richmond represent almost 37.8 percent of all reportable statewide taxable sales and purchases for the latest annual period. With the exception of the latest annual selling period, New York City sales had expanded continually since the mid 1990's, growing from $\$ 69.6$ billion in 1997-1998 to $\$ 86.0$ billion in 2000-2001. Reported taxable sales and purchases for 2001-2002 decreased by 6.2 percent to $\$ 80.7$ billion (Table 5 and Figure 4).

Figure 4: Five-Year Trend for New York City (In Billions)

Table 6 summarizes New York City's annual total taxable sales and purchases by industry for the state tax base. For the most recent selling period ending February 2002, sales tax vendors reported $\$ 75.4$ billion in New York City taxable sales and purchases, a decrease of $\$ 5.3$ billion or 4.5 percent from the same period one year earlier.

New York City experienced most of the decline in taxable sales throughout the state during the sales tax year from March 2001 through February 2002. The City not only suffered from the World Trade Center disaster, but as a financial center, it also dealt with the impact of a severe downturn in the financial markets as the bull market of the 1990's ended from the onset of a national recession.

Table 6: New York City Annual State Tax Base Industry Totals

* Preliminary
** Revised
For both the State and City, retail sales provide the largest share of taxable sales and purchases among the major industry sectors in the state tax base. For the most recent selling period, retail sales represent 46.7 percent of all taxable sales statewide, in contrast with 33.2 percent within the City. This disparity reflects the greater importance of taxable services in the state sales tax base in New York City.

In New York City, the only industries to post a percentage increase from the previous year were the utilities industry ( 8.2 percent) and the information industry ( 0.8 percent). All other industries experienced declines in reported sales and purchases ranging from the health care industry ( -0.6 percent) to the manufacturing industry (-14.7 percent). Other industries experiencing substantive declines were the wholesale trade ( -13.6 percent) and the accommodation and food services ( -10.6 percent) industries. Within the accommodation and food services industry, the accommodation sector experienced a 23 percent drop from the previous annual selling period. Much of the reported dip in taxable sales and purchases can be attributed to the immediate impact of the World Trade Center disaster on New York City's economy.

Table 7 summarizes the local tax base component of New York City's taxable sales and purchases. New York City reports taxable sales for two industries not taxed by New York State or any county outside New York City. The first industry includes: 1) fuel and utility services used in the production of property for sale and 2 ) installation, repair, and maintenance services for property used in farming. (Effective November 1, 2000, only fuel and utilities used in the production of gas, electricity, refrigeration, and steam remain taxable.) The second industry sector includes parking services, hotel room occupancy services, and miscellaneous services (cleaning and maintenance services, credit rating and reporting services, and interior decorating and design services).

Table 7: New York City Annual Local Tax Base Industry Totals (In Thousands)

|  | Selling |  | Period |

Taxable sales and purchases reported from the 1.5 percent sales tax on residential energy comprise 68.2 percent of New York City's local tax base. Taxable sales for residential energy fell by 32.4 percent during the year.

New York City elected to exempt locally imposed sales and use tax on clothing when the State implemented the permanent sales and use tax clothing exemption on March 1, 2000. This sales and use tax exemption applied to clothing items and footwear costing less than $\$ 110$.

## Counties Outside

 New York CityPreliminary data indicates that taxable sales and purchases in counties outside New York City reached $\$ 133$ billion for the year ending February 2002 (Table 8). This value represents a 1.0 percent increase from the previous year and an 18.4 percent increase from sales reported five years ago. Figure 5 shows that taxable sales and purchases reported outside of New York City for the last annual selling period continued to grow during the national recession. This trend contrasts with the decline in New York City during that same period.

Table 8: All Counties Outside of New York City Combined Annual State and Local Tax Base Totals (In Thousands)

| Period | Taxable Sales \& Purchases | Change from Previous Period |  |

Figure 5: Five-Year Trend for Counties Outside of New York City (In Billions)

Analysis of the state tax base industry data presented in Table 9 reveals that the arts, entertainment and recreation industry reported the largest gain ( 6.2 percent) of any major industry from the same period in the previous year. The next largest gains were reported by the retail trade industry ( 3.7 percent) and the information industry ( 3.2 percent). Within retail trade, sales from the motor vehicles and parts sector ( 7.6 percent) saw the most significant gain. Following the pattern of New York City, the two industries to report the largest declines were the wholesale trade ( -8.9 percent) and manufacturing ( -6.9 percent) industries.

Table 10 provides a look at the annual industry totals for the local tax base portion of taxable sales and purchases for counties outside of New York City. Taxable sales and purchases for the March 2001 through February 2002 selling period decreased by 2.0 percent, primarily due to a 12 percent decline in local taxable sales on residential energy. This decline was brought about by a 13 percent drop in heating degree days in New York State during the period. Taxable sales and purchases from the 1.5 percent sales tax on residential energy together with the local sales tax collected on clothing sales contributed 98.7 percent to the local tax base for all counties outside of New York City.

Table 10: All Counties Outside of New York City - Annual Local Tax Base Industry Totals (In Thousands)

Methodology and Data Limitations

The taxable sales and purchases statistics presented in this report come from more that three million data items reported on about 250,000 sales tax returns filed each quarter with the New York State Department of Taxation and Finance. Most of the 300,000 annual returns are filed following the year-ending sales tax quarter that closes on February 28. The report aggregates quarterly data into annual periods to dampen fluctuations caused by vendor late reporting, account reconciliation of prior period activities and amended returns.

This report provides a snapshot of a continuously changing sales tax file. File records are updated daily to reflect late and amended returns and corrected return information. A recent analysis of data corrections to the sales tax file indicates that a minimum time period of two years is necessary to generate the data to produce this report. During this period, vendors file their sales tax returns, including amended and late-filed returns. As the returns are filed, the Department has the tax return data entered onto data files, obtains any missing data, checks for data inconsistencies, corrects the data errors and processes the tax payments with the returns. Only after the Department completes this process, will the file records be ready to serve as the data base for preparing this report.

The data in this publication supersedes information included in earlier reports. Although this report includes information for a 12-month period and annual percent changes are computed, special care should be taken when using these percent changes. As noted above, sales tax data are subject to continual review. A significant part of these revisions relate to vendor over- and under- reporting.

This report generally classifies taxable sales and purchases within industrial sectors based on the vendor-reported industry or the industry code identified on the vendor registration form. These codes, from the North American Industry Classification System (NAICS), are listed with their corresponding numerical ranges in Appendix A.

Classification problems arise when vendors inadvertently misclassify or fail to identify their primary business activity. For example, a wholesaler who also conducts retail sales may not understand to classify the primary business as wholesale trade. Misclassification problems are nearly impossible to remedy. The Office of Tax Policy Analysis has been able to classify some vendors who did not classify themselves. After this effort, less than two percent of the taxable sales and purchases of vendors remain unclassified.

Some counties tax both residential and nonresidential energy sales. However, New York State and a number of counties that are listed in Appendix B do not tax residential energy sales. In an effort to present a more accurate representation of the State's taxable sales and purchases base for each county, residential energy sales, local clothing taxable sales, and any other local-based taxable sales and purchases that are exempt from state tax are no longer combined with the state taxable sales and purchases base. Instead, they are presented in a separate table for the local tax base.

Appendix C shows combined State and local sales tax rates in each county and identifies changes that occurred during the most recent reporting period. These data are presented for informational purposes.

Appendix D identifies the counties that elected to exempt the locally imposed sales and use taxes on clothing and footwear. It also provides the rates imposed by those counties not electing to exempt the local sales tax.

Data users are cautioned that industry taxable sales may represent only a portion of industry gross sales. Moreover, the percent of sales that are taxable can vary from period to period. As such, taxable sales may not directly reflect the correct level or trend of aggregate economic activity for the industry.

## Appendix A: North American Industry Classification System Code Ranges By Industry

The industry codes displayed in this report correspond to the North American Industry Classification System (NAICS) codes published by the U.S. Office of Management and Budget. Sales tax vendors are asked to identify their primary business function and identify themselves using NAICS codes. This process is voluntary and subject to the tax preparer's understanding of the classification codes.

## North American Industry Classification System Code Ranges

| Industry | 2 Digit <br> NAICS Code | 3-6 Digit <br> NAICS Code Range |
| :---: | :---: | :---: |
| Utilities | 22 | 221-22133 |
| Construction | 23 | 233-23599 ${ }^{1}$, 236-23899 ${ }^{2}$ |
