Appendix	Appendix: New York State Personal Income Tax Returns—2008	A-1
----------	---	-----

Introduction

This annual study provides statistical information on 2008 New York State personal income tax returns that were timely filed during 2009. The data are from full-year resident, full-year nonresident, and part-year resident returns. The report categorizes returns as either taxable or nontaxable depending on the presence or absence of taxable income and income tax liability. Data presented include the distribution of New York adjusted gross income and tax liability by place of residence and the value of deductions, exemptions, and taxable income by income class.

Residents, Nonresidents, and Part-year Residents

Generally, full year-resident filers for tax purposes are individuals who live in New York during the entire year. However, some full-year residents have a permanent home (i.e. a domicile) in New York, but can live in another state or country for most of the year. Other residents have a permanent home outside the state, but maintain living quarters in New York State and are present in New York for more than half of the tax year. The county of residence for resident filers is as of December 31, 2008.

Nonresident filers are generally individuals who live outside New York, but who receive income from activities within the State. These filers frequently reside in states bordering New York and commute to work in New York. Nonresident filers also include previous New Yorkers presently residing in other states such as Arizona and Florida. Finally, this category includes information from residents of foreign countries receiving taxable income from sources within New York.

Part-year resident filers are individuals who meet the definition of a resident for only part of the tax year. Typically, part-year residents move into or out of the state during the year.

Taxable, Nontaxable, and All Tax Returns

All tax returns filed by residents, nonresidents and part-year residents are categorized as either taxable or nontaxable returns. Returns that have a New York State tax liability after having been processed by the Tax Department are defined as taxable returns. Nontaxable returns do not have a tax liability. Individuals may file nontaxable returns to fulfill legal filing requirements, receive a refund of income tax withholding, or to claim refundable credits. Major individual credits that are refundable without a tax liability include those for earned income, child and dependent care, real property tax, college tuition, children ages 4 to 16, and farmers' school tax. These credits are administered through the personal income tax law.

Comparison With Other OTPA Data

This report tabulates information from returns filed with the Tax Department for 2008. The data represent amounts accepted by the Department's tax return processing system and its tolerances. The information is collected prior to income tax exceptions manual review and may contain data entry errors. Analysts have attempted to adjust the most egregious mistakes.

The statistics reported in this publication do not completely coincide with data presented in the *Analysis of 2008 Personal Income Tax Returns* (PIT) publication, which is also prepared by the Office of Tax Policy Analysis (OTPA). Data in that report are derived from a statistically valid sample of approximately 644,000 tax returns. After drawing the sample, OTPA subjects each tax return to extensive data verification, editing, and correction. The completed sample file is weighted to represent the 2008 filing universe. Data pass through a comprehensive verification and correction process subjecting the sampled records to more restrictive data tolerances than the data appearing in this report. However, data in the report are also subject to sampling error.

Beginning with this year's report, the New York Adjusted Gross Income (NYAGI) of nontaxable returns produce negative NYAGI and the negative value is reflected in the report. The total NYAGI for nontaxable returns found in prior years' reports took negative values of NYAGI and adjusted them to zero. The result is a reduction in the value of total NYAGI of nontaxable returns in this year's report compared to prior years. For example, in Table 3 of this year's report, the number of nontaxable returns and total NYAGI in Manhattan is 230,930 and -\$2.4 billion respectively. In 2007, 245,488 nontaxable returns were filed in Manhattan with a total NYAGI of \$2.7 billion. This change in the reporting of negative NYAGI values is a result of a change in the Department's tax return processing system.

Findings

All Filers Summary

In 2009, the department received nearly 9.6 million timely filed New York State personal income tax returns for the 2008 tax liability year. This value compares with nearly 9.7 million tax returns filed for the 2007 tax liability year, a decrease of approximately 106,400 returns. These filers reported total New York adjusted gross income of \$846 billion in 2008, a decrease of 15.8 percent from \$1,004 billion in 2007. Aggregate tax liability for 2008 was \$31.6 billion, a decrease of 10.1 percent from \$35.2 billion in 2007.

Some major findings for 2008 include:

- Approximately 90 percent of all tax returns and 83 percent of all tax liability were from full-year residents of the state.
- New York adjusted gross income for all filers decreased by over \$158 billion, reflecting a 15.8 percent fall from 2007.
- New York adjusted gross income for full-year residents decreased by \$67.4 billion, or 10.5 percent, below the 2007 amount.
- The second largest share of New York adjusted gross income and tax liability belonged to full-year nonresidents. Their reported income from federal sources, including non-New York income, reached \$258.6 billion. Income tax liability decreased to \$4.8 billion from \$5.0 billion in 2007.
- Part-year resident filers reported the smallest share — \$15.7 billion in income and \$486 million in tax liability.

Table 1: Total Income and Tax Liability by Place of Residence in 2008

(Dollar data in Thousands)

Item	Full-Year Residents	Full-Year Nonresidents	Part-Year Residents	Total

* Total income is New York Adjusted Gross Income on resident tax forms IT-150 and IT-201 and Line 31 (New York Adjusted Gross Income-federal amount) on full-year nonresident and part year resident form IT-203.

** Includes refundable tax credits.

Full-Year Residents

The 8.6 million full-year resident tax returns reported New York adjusted gross income (NYAGI) of \$571 billion and a tax of \$26.3 billion. Table 2 shows 50 percent of all returns had NYAGI of less than \$30,000. This group accounted for 7.0 percent of all income and as a whole had a net negative tax liability. Taxpayers with income in excess of \$200,000 accounted for 3.7 percent of all tax returns, 43.3 percent of NYAGI, and paid 56.4 percent of tax liability.

* New York Adjusted Gross Income on resident tax forms IT-150 and IT-201.

The effective tax rate, defined as tax liability as a percentage of NYAGI, equaled 4.61 percent for all resident filers in 2008. In other words, resident filers paid an average state income tax of \$4.61 for every one hundred dollars reported in adjusted gross income.

Average effective tax rates ranged from being negative for filers with under \$20,000 in income, to 6.00 percent for filers with income in excess of \$200,000. Filers with no state income tax liability who are eligible for refundable credits have a negative income tax and a negative effective tax rate. Refundable credits include the earned income tax credit, the child and dependent care credit, the college tuition credit, the farmers school tax credit and the real property tax credit, among others.

Table 2A depicts the income tax components of full-year residents by size of income without including the returns of taxpayers who can be claimed as dependents on other taxpayers' returns, such as students. Removing dependent filers provides a clearer representation of the income distribution of full-year resident taxpayers.

Table 2A: Income Tax Components of Full-Year Residents by Size of Income (All Returns) in 2008 Minus Dependent Filers
(Dollar Data in Thousands)

Income Class	Number	NYAGI*	Deductions	Dependent Exemptions	Taxable Income	Tax Before Credits	Tax Liability

* New York Adjusted Gross Income on resident tax forms IT-150 and IT-201.

Tables 3, 4, and 5 detail resident information by county. New York City data are presented first, followed by an alphabetical listing of counties excluding the five counties that represent the City of New York.

Table 3 depicts the distribution of tax returns, NYAGI, and tax by county and tax status. The type of tax form filed determines a filer's permanent place of residence. This publication defines individuals filing a resident tax form (IT-150 or IT-201) as full-year residents. Resident tax returns that have New York State addresses but indicate no county of residence are categorized as "NYS Unclassified." Resident returns can also have out-of-state addresses. Returns in this category occur because the department accepts resident returns from part-year residents who have moved to another state during the year. Resident returns can also come from individuals who use the out-of-state addresses of their tax preparers, or use the addresses of their permanent homes or domiciles in other states while they maintain living quarters and are present in the state for more than half a year. Resident tax returns that have out-of-state addresses but show no New York county of residence, are still classified as resident returns, but they are put in the "Residence Unknown" category.

Table 4 displays major income tax structure components: income, deductions, dependent exemptions, and tax liability by county. The table also provides this information by size of income.

Table 5 provides average income and tax liability by county. The data indicate that the distribution of income is highly variable across counties within New York for resident filers.

* New York Adjusted Gross Income on resident tax forms IT-150 and IT-201.

+ Resident returns that could not be classified by county.

++Includes resident tax returns (IT-150 and IT-201) with an out-of-state address.

Nonresidents

Tables 6 through 8 provide information on individuals who resided out of state for the entire year but who had income from New York sources. Data reported on these individuals have been classified by the federal amount of New York adjusted gross income (NYAGI), as determined on form IT-203. Over 798,000 returns fell into the nonresident category during 2008. The neighboring states of New Jersey, Connecticut, Massachusetts and Pennsylvania accounted for 67 percent of all nonresident income tax filers. These states, as shown in Figure 1, accounted for approximately 79 percent of the total New York income tax liability paid by full year nonresidents.

Figure 1: Share of Nonresident Tax Liability by Place of Residence in 2008

Table 6 shows income tax components by size of income for full-year nonresidents. Note that values for income, deductions, dependent exemptions, taxable income, and tax before credits are reported as if these filers were residents. New York State requires nonresidents to report income, deductions, and dependent exemptions as they would for federal tax purposes and compute an initial tax as if they were full-year residents of New York. Next, nonresidents prorate the initial tax based on the relationship of New York source income to federal source NYAGI.

As illustrated in Table 6, the number of full-year nonresidents filing a New York State personal income tax return totaled 798,174 in 2008. This was an increase over the 773,782 filed in 2007. Also, the 2008 average New York tax liability for full-year nonresident returns of \$6,057 decreased 6.7 percent from the 2007 average of \$6,491. The \$6,057 average nonresident tax was \$2,991 more than the average tax of \$3,066 reported on full-year resident returns primarily because of higher income and the limited availability of refundable credits to full-year nonresidents.

Table 6A depicts the income tax components of full-year nonresidents omitting dependent filers by size of income.

Table 7 presents total NYAGI and tax liability for nonresidents displayed by place of residence. The table supports New York's reputation as both a national and an international economic hub. Similar to the changes made to the classification of certain resident returns, the Office of Tax Policy Analysis classifies nonresident (IT-203) returns with New York State addresses as nonresidents with "residence unknown". This category frequently includes nonresident filers using New York State based tax preparers.

Table 7 contains the nonresident tax returns from all states that had at least one thousand tax returns and the five countries with the greatest number of tax returns for tax year 2008. The report shows the number of nonresident returns with income from New York for 35 different states (including the District of Columbia). The data in the table indicates that there was an increase of over 24,000 nonresident returns filed in 2008 compared to 2007, with income and tax liability decreasing by 25.6 and 3.7 percent, respectively.

Table 8 includes income tax component information by size of income as reported by nonresidents for selected states and countries. As expected, the distribution of income varies considerably because nonresidents range from retirees who maintain a limited connection to New York, to persons who reside out-of-state who have earnings from work in New York.

* Federal source New York Adjusted Gross Income (includes non-New York income).

+ Includes unclassified and individuals filing a nonresidential IT-203 return but indicating a New York address. This category includes tax returns completed by preparers located in New York filing on behalf of nonresidents.

Part-Year Residents

Tables 9 and 10 highlight information on individuals who had income from New York sources and resided in New York for only part of 2008. As with full-year nonresidents, data reported by these individuals have been classified by the federal amount of New York adjusted gross income (NYAGI), as determined on form IT-203.

In 2008, part-year resident filers represented 2.1 percent of all personal income tax filers. As Table 9 indicates, the number of filers identified as part-year residents decreased by 7.7 percent to 204,166 in 2008. Tax liability reported by part-year residents was \$486 million in 2008, or 11.3 percent less than 2007.

OTPA uses a multi-step process for assigning tax returns to the part-year resident category. The primary selection criterion, also used for classifying full-year resident and full-year nonresident filers, is tax return type. In effect, OTPA considers only tax form IT-203 filers for the potential part-year return population. This selection method adheres to personal income tax form instructions which direct part-year filers to use the IT-203 tax form. However, the part-year population reported in this study is understated to the extent that part-year filers file resident tax returns. For example, move-ins may file a resident tax return although they are a resident for only a portion of the tax year and they have no New York income during their nonresident period. For the purposes of this report, data from these filers are included in the full-year resident tables.

After limiting the potential part-year resident populations to IT-203 form filers, OTPA computer programs review the tax forms to select the part-year tax form check-off box, permanent address, and tax mailing label address information. These data are used to cull the part-year filers from the entire IT-203 population. Unfortunately, the data presented in these fields are not always critical to the processing of the return. Part-year resident information can often be conflicting, potentially misleading and incomplete, thereby reducing the reliability of the data.

Two other factors further diminish the usefulness of these data as a tool for understanding migration trends. First, the data are not an inclusive representation of part-year resident activity occurring within the state. Part-year residents filing a resident return are identified as full-year residents. Also, the displayed information includes data only from filers with a continuing linkage to the state's income tax law. For example, individuals moving out-of-state with no income attributable to New York are not required to file a New York tax return. An additional potential complexity is the effect that length of residency has on income and tax liability data presented in the table.

Table 9: Total Income and Tax Liability of Part-Year Residents In 2007-2008
(Dollar Data in Thousands)

Item	2007	2008	Change	
			Number	Percent

* Federal source New York Adjusted Gross Income (includes non-New York income).

Data Sources

The information contained in this report comes from an examination and tabulation of selected data variables reported by filers on their 2008 New York State income tax returns. The full-year resident data were drawn from the two resident tax forms: The IT-150 short form and the IT-201 long form. Full-year nonresident and part-year resident filers generally file the IT-203 income tax form. A copy of each resident, nonresident, and part-year resident tax return for 2008 appears in the Appendix.

Tax Liability and Collections

The data presented in this report represent tax liability and not tax collections. Tax liability is defined as state income tax owed as reported on a New York State personal income tax return. In contrast, annual tax collections summarize all payments made under the income tax law for at least three tax return years. These payments include withholding, collections on audit assessments for current and prior year returns, settlements on current year returns (final payments and refunds), and estimated payments for subsequent year returns.
