Introduction and Background

Chapter 170 of the Laws of 1994 created the New York State earned income tax credit (EITC), which became effective in 1994. Authorized by Section 606(d)(7) of the Tax Law, the credit equaled 30 percent of the Federal EITC for the 2008 tax year. New York residents may receive a refund of any excess credits. The credit is nonrefundable to nonresidents. Taxpayers must file a New York State income tax return to receive the earned income tax credit.

Table 1 provides a summary of the major provisions of both the Federal and New York credits. The Federal credit equals a percentage of earned income, up to a maximum credit amount. At greater income levels, the credit begins to decline as income increases. Maximum earnings and income phase out levels are indexed annually for inflation. Taxpayers must receive earned income to claim the credit.

Twenty-four states currently provide an earned income tax credit. Twenty-three states, including New York, are linked to Federal law. There are also two local governments, in addition to New York City, that have their own EITCs.

Table 2 lists these states and localities and provides comparative information on their credits.

Legislation enacted in 1995 amended the State EITC in two ways. First, it increased the percentage for tax year 1996 from the previously scheduled 15 percent to 20 percent of the Federal credit. The scheduled percentage for 1997 and thereafter remained at 20 percent. Second, it restored the household credit for 1996 and thereafter, and requires taxpayers to subtract it from their EITC.

Legislation enacted in 1999 increased the EITC from 20 percent of the Federal credit to 22.5 percent in tax year 2000, and to 25 percent in tax years beginning after 2000. However, the rate will revert to 20 percent if the Federal government reduces New York's allocation of temporary assistance for needy families (TANF) grant, or does not permit spending on the EITC to apply toward the TANF maintenance of effort requirement.

Legislation enacted in 2000 further increased the EITC to 27.5 percent of the Federal credit in 2002 and to 30 percent after 2002. These increases are similarly predicated upon funding through the Federal TANF grant.

Legislation enacted in 2004 first created a New York City EITC equal to 5 percent of the Federal credit first effective in tax year 2004.

Legislation enacted in 2006 created an enhanced State earned income tax credit (EITC) for certain noncustodial parents in lieu of the existing State EITC that they may claim. To qualify for the Noncustodial Parent New York State Earned Income Credit, claimants must be residents, age 18 and over, and have a minor child with whom they do not reside. They must also have a child support order in effect requiring support payments through a support collection unit established pursuant to 111-h of the Social Services Law, for at least half of the tax year, and must have made the required support payments. The enhanced credit is equal to the greater of: a) 20 percent of the Federal EITC that the taxpayer would otherwise be able to claim for one qualifying child as a custodial parent or, b) 2.5 times the Federal EITC for taxpayers without qualifying children. The credit is fully refundable and is available for taxable years beginning on or after January 1, 2006 and before January 1, 2013.

Federal legislation enacted in 2009 provides a temporary increase in the Federal EITC for tax years 2009 and 2010 only. Married taxpayers will benefit from an extended phase-out range. Claimants with three or more qualifying children will receive higher benefits. Both of these enhancements will increase the New York State and New York City EITC for qualifying taxpayers.

This statistical study results from a legislative mandate. The Department of Taxation and Finance (the Department) must submit to the Governor and the Legislature an annual preliminary report by September 30, and an annual final report by February 15 of each year. The legislation mandates the reporting of detailed data, on a county-level basis, showing the usage and value of the EITC. It also requires classification of this data by amount of earned income, size of credit, and number of qualifying children. Appendix A contains the actual mandate for this statistical study as contained in Chapter 170 of the Laws of 1994 (the New York State EITC) and Chapter 60 of the Laws of 2004 (New York City EITC).

* Must be over age 24 and under age 65.

** The credit is reduced by the amount of household credit used.

*** Beginning in tax year 2002, married taxpayers filing jointly and all other taxpayers have different earnings for the start of the phase-out and income cut-offs.

****Beginning in tax year 2004, New York City full and part-year residents may claim a New York City EITC equal to 5 percent of the

Federal credit. For tax year 2008, these amounts are a maximum \$22 for workers without children, \$146 for families with 1 qualifying child, and \$241 for families with 2 or more qualifying children.

Note: Credit is refundable to residents, but nonrefundable to nonresidents. Phase-out based on greater of earnings or modified FAGI.

Notes:

- (1) Credit is only available if state revenues exceed constitutional spending limitations. The State will not offer the credit for tax years 2002-2010.
- (2) Credit is expanded to 18 percent for tax years 2010-2012, but is scheduled to revert to 17 percent thereafter.
- (3) Beginning in tax year 2010 the credit is partially refundable up to \$150 for joint filers and \$125 for other taxpayers.
- (4) Taxpayers with one or more dependents may claim a refundable credit equal to 25% of the Federal credit.
- (5) Credit is not based on the federal credit, but on earned income at various rates for each filing status.
- (6) 15% of the unused 25% State credit is refundable to taxpayers.
- (7) For 2010, the credit is scheduled to be calculated based on pre-2009 Federal law, but this change may be reversed by special legislation.
- (8) The credit is scheduled to increase to 10% of the Federal credit in 2011.
- (9) The percentage of the Federal credit allowed varies by number of children - 4% (one child), 14% (two children, and 43% (three or more children).

Nature and Purpose of the EITC

Congress adopted the Federal earned income tax credit as part of the Tax Reduction Act of 1975. It subsequently expanded the scope and enriched the size of the credit three times – in 1986, 1990, and 1993. In each case, both qualifying earnings and corresponding credit amounts increased significantly. Most recently, Congress enacted the Economic Growth and Tax Relief Reconciliation Act of 2001 (P.L. 107-16) which seeks to reduce any EITC marriage penalty by specifying higher earnings for the start of the phase-out and income cut-offs for married taxpayers filing jointly.

While Congress has expanded both the size and scope of the earned income tax credit, it has generally retained the credit's basic structure. It applies at a fixed rate of earned income up to a maximum amount of earnings, resulting in a maximum credit amount. When the higher of earnings or federal adjusted gross income (FAGI) exceeds the maximum earnings amount, the credit begins to phase out at a fixed rate. The EITC first functions like a negative income tax, because it is fully refundable if it exceeds tax liability.¹ It then becomes fixed over a narrow income range and, finally, it creates an additional marginal tax rate over the phase-out range. Figure 1 illustrates the relationship between credit amounts and earnings (or FAGI, if greater) by qualifying status.

Figure 1: 2008 New York State Earned Income Tax Credit by Earnings.

Source: OPA calculation.

Note: Credit amounts are not reduced by the household credit. Married taxpayer phase-outs shown.

The EITC serves several intertwined purposes within the Federal tax and transfer system. First, because it is based on earned income, it acts as a type of wage subsidy. This increases the net return on work effort and thus is intended to encourage either additional work effort or higher labor force participation. Either response would mean that the credit helps make work a more attractive alternative to welfare.²

Second, Congress intended the EITC to offset all or part of the payroll (Federal Insurance Contributions Act, or FICA) tax burden faced by lower-income workers.³ Because the FICA tax contains no deductions or exemptions, it can prove especially burdensome for workers with earnings in the range of those qualifying for the EITC. Over time, increases in maximum credit amounts have more than offset the increases in FICA tax rates, making the current maximum EITC substantially greater than the combined employee-employer share of FICA tax paid on the same earnings.

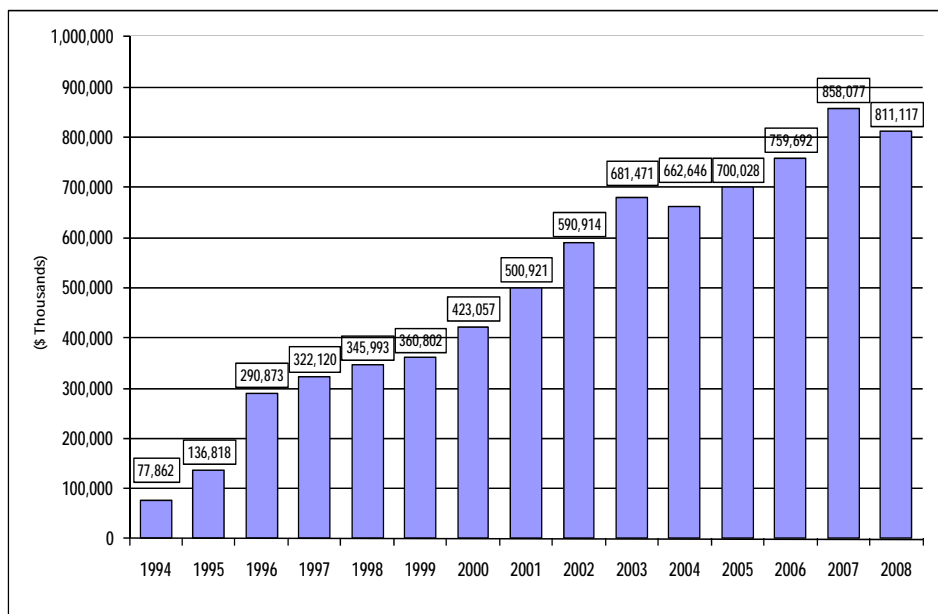

Finally, because it phases out as income increases, the EITC plays a general role in increasing the progressivity of the Federal income tax. The EITC targets tax relief to low and moderate-income taxpayers, while its refund ability feature provides cash rebates to the lowest-income workers. The New York earned income tax credit serves similar purposes as well. In addition, because New York does not impose any FICA-like payroll taxes, the New York EITC goes completely toward either reducing the personal income tax burden, or providing cash rebates. In tax year 2008, approximately 84 percent of the total earned income credit claimed was refundable to taxpayers. This is similar to the percentage of the Federal EITC which is refundable under the Federal income tax.

Table 3 provides a general statistical overview of the 2008 EITC by taxpayers' place of residence. Some major statistical highlights include:

- The total earned income credit claimed decreased from approximately \$860 million in 2007 to just over \$811 million in 2008. Figure 2 shows how the total credit claimed has changed over tax years from 1994 through 2008.

- Approximately 1,439,000 returns claimed an earned income tax credit, or a 4.5 percent decrease over 2007. This represents about 15 percent of all taxable and nontaxable returns. Figure 3 shows credit claimants since the inception of the EITC.
- Average credit amounts varied by county ranging from a low of \$445 in Putnam County, to a high of \$676 in Rockland County. The statewide average credit for all filers equaled \$564
- The average credit for nonresidents, part-year residents, and unclassified claimants was less than half the average for residents.

Figure 3: Total New York State Earned Income Tax Credit Claimants – 1994-2008

As shown on Table 1, EITC eligibility and amounts vary by family size. Workers with children can earn considerably more income before the credit phases out. They also qualify for considerably higher credit rates. Table 4 below summarizes credit usage by family size for all taxpayers.

Taxpayers must file both a regular income tax return and form IT-215 to claim the EITC. This procedure differs from that for claiming the real property tax circuit breaker credit. Taxpayers may claim that credit using a “stand alone” form IT-214, without having to file a regular tax return. Appendix B contains a copy of form IT-215 and instructions

Summary Statistics: New York City EITC

Table 5 provides a general statistical overview of the 2008 New York City EITC by county of residence. Some major statistical highlights from the second year of this tax credit are as follows:

- The total New York City earned income credit in 2008 was \$79.9 million compared to \$87.7 million in 2007.
- A total of 812,242 taxpayers claimed the New York City credit in 2008 versus 865,341 in 2007.
- Excluding part-year taxpayers who moved-out to other non-New York City counties or other states, total New York City credit claimants were 801,069. This figure is roughly comparable to the 788,057 similarly situated taxpayers who claimed the New York State credit.
- The average New York City credit for 2008 was \$98. The highest average credit is found in Bronx County (\$109). The lowest average credit is found in Queens County (\$92).

Like the Federal and New York State EITCs, the New York City credit amounts vary by family size. Table 6 shows that the distribution of New York City claimants and credits allows by family size is very similar to that for the New York State credit (see Table 4).

Statistical Tables Accompanying This Report

The statistical tables in this report provide information on the number of EITC claims, and their total and average dollar amounts for both the New York State and New York City credits in separate sections. The New York State information is displayed alphabetically by county. It is followed by summary data for New York City and its counties. The last section presents aggregate statistics for full-year nonresidents, part-year residents moving out of New York and data for filers with missing addresses. The New York City credit section also lists information in a similar fashion.

Within each county, EITC usage is shown by \$4,000 ranges of earned income, and by number of qualifying children. As used here, earned income includes wages, salaries and tips; business income or loss; and certain other taxable and nontaxable income. EITC usage is shown by three filing statuses – single, married filing joint, and head of household. Qualifying widows(ers) are included in the married filing joint category, and married taxpayers filing separate returns are included in the head of household category. Disclosure limitations did not allow for displaying these two filing statuses separately. The average credit value displayed in the total column includes in its computation values of less than \$500.

The information in the following tables comes from IT-215 forms filed through December 2009. It includes claims for EITC that passed the Department's two-stage verification procedure, and therefore were credited or paid to taxpayers. Taxpayers who did not file returns through December 2008 may file a claim for EITC for the 2008 tax year until April 15, 2012.

Endnotes

1. About 88 percent of the Federal EITC constitutes cash rebates to persons filing tax returns, but not owing tax. For New York taxpayers, approximately 83 percent of the Federal EITC constitutes cash rebates.
2. However, the way in which the credit phases out significantly increases the marginal tax rate on workers in the phase out range, thereby potentially reducing their incentive to earn additional wages.
3. For elaboration on the tax policy objectives of the earned income credit, see Joseph Pechman, *Federal Tax Policy, Fifth Edition*, (Washington, D.C., The Brookings Institution, 1987). For a comparison and analysis of state programs, see Center on Budget and Policy Priorities. *State Earned Income Tax Credits: 2009 Legislative Update* (November 10, 2009).
4. This percentage is based on a simulation of taxpayer liability that does not take into account taxpayer prepayments.
